1981 Annual Report

Oklahoma Department of Human Services

BEST AVAILABLE COPY

Letter of Transmittal

The Honorable George P. Nigh
Governor of the State of Oklahoma

Dear Governor Nigh:

The *1981 Annual Report of the Department of Human Services* is an accounting of expenditures and a review of services provided during the fiscal year ending June 30, 1981.

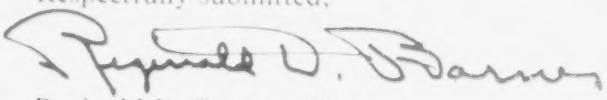
July saw the end of the Department's 45th year and because of legislative action mandating fundamental changes in funding, it marked the beginning of a new era in public welfare in Oklahoma.

This report includes the history of those eventful 45 years. There are features designed to serve as a resource for persons wanting information about how the Department grew, when and from what agencies the institutions and other functions were transferred, and the background of many programs under the DHS umbrella.

Major developments of the year and activities of the various programs are covered in the narrative. Analyses of costs, services and persons served are presented in charts, graphs and tables.

The Annual Report is published in compliance with Section 2 of the Oklahoma Social Security Act of 1936.

Respectfully submitted,



Reginald D. Barnes, Chairman
Oklahoma Commission for Human Services

November 1, 1981

Constitution of Oklahoma
Article XXV.—Social Security

—In order to promote the general welfare of the people of the State of Oklahoma and for their protection, security, and benefit, the Legislature and the people by initiative petition are hereby authorized to provide by appropriate legislation for the relief and care of needy aged persons who are unable to provide for themselves, and other needy persons who, on account of immature age, physical infirmity, disability, or other cause, are unable to provide or care for themselves; Provided, the Legislature or the people by initiative petition, are further authorized, in co-operation with and under any plan authorized by the Federal Government for State participation, to provide by appropriate legislation for the relief and care of aged or needy persons.

The levy of taxes, other than ad valorem taxes, necessary to carry into effect legislation enacted pursuant thereto, is hereby authorized. As added State Question No. 225, Initiative Petition No. 154, adopted July 7, 1936. As amended State Question No. 299, Referendum No. 81. Adopted special election March 11, 1941.

Oklahoma Commission for Human Services

Governing board of the Department of Human Services is the Commission for Human Services, a nine-member body established by a 1936 amendment to the State Constitution.

Members are appointed by the Governor to staggered nine-year terms, which makes for continuity in the conduct of Department affairs. One term expires each August.

Reginald D. Barnes, Tulsa, has served as chairman since 1969 and has been a member since 1962.

Reappointed to a record fourth term this fiscal year was Robert M. Greer, Enid, the vice chairman and senior member in point of tenure. Greer was named to the Commission by Governor Johnston Murray in 1953. He was reappointed by Governor J. Howard Edmondson in 1962, by Governor David Hall in 1971, and by Governor George Nigh in August 1980.

The Commission formulates Department policy within statutory limitations. Its broad responsibilities include administering the State Assistance Fund and authorizing all expenditures.

Appointment of the Director of Human Services is another constitutional power vested in the board. Lloyd E. Rader, Hinton, has been Director since 1951.

Regular meetings are held the fourth Tuesday of the month.

The Commission is also known by its constitutional name, the Oklahoma Public Welfare Commission. It was given the optional name of the Oklahoma Commission for Human Services by the 1980 State Legislature which also gave the agency the new Human Services title.

Chairman Reginald D. Barnes, Tulsa

Vice Chairman R.M. Greer, Enid

Wilbur D. Cave, Fairfax

Leon N. Gilbert, M.D., Bethany

W.E. Farha, Bristow

Mrs. Robert I. Hartley, Vinita

L.E. Rader, Director of Human Services

Wennette W. Pegues, Ed.D., Tulsa

Joe D. Voto, Atoka

Carl E. Ward, O.D., Sayre

The Department of Human Services helps the needy, the aged, the handicapped, the dependent and neglected, the delinquent, the sick and others who need services in order to become as self-sufficient as possible. Founded in 1936 as a welfare agency, DHS is also known as the Department of Public Welfare. It continues to administer cash assistance grants, but today the Department operates 30 programs which include 19 institutions.

Medical Programs

Medicaid provides payment for physicians' services, hospitalization, nursing home care and non-technical medical care in the home for the eligible needy. Medicaid funds also are used to pay the Medicare buy-in premiums for state supplemental payment recipients. Another service is an Early and Periodic Screening, Diagnosis and Treatment program for persons under 21.

Those eligible for Medicaid include AFDC and state supplemental payment recipients (aged, blind or disabled) and some persons whose medical expenses would reduce their finances to a level that would make them eligible for public assistance.

Vendor Drug Progam provides a limited number of prescription drugs for persons getting AFDC or supplemental payments to the aged, blind and disabled.

Crippled Children's Services make available medical and dental care for a variety of problems to children who can benefit from treatment. Diagnosis, corrective treatment and hospitalization are included.

Assistance Payments & Food Programs

State Supplemental Payments provide a monthly state payment to supplement federal Supplemental Security Income or other income to eligible people who are aged, blind or disabled. Eligibility is determined by the applicant's income, resources and needs. Recipients are eligible for medical benefits and related services.

Aid to Families with Dependent Children provides monthly assistance payments to eligible needy families with children who have been deprived of support and care by one or both parents because of parent's death, incapacity or continued absence from home.

Energy Assistance helps eligible low income families and individuals pay home heating and cooling bills in extreme weather.

General Assistance and Emergency Assistance provides limited cash aid to help individuals and families meet a crisis.

Refugee Assistance offers a cash grant for medical care and services for eligible refugees.

Emergency Welfare Services provides grants to qualified individuals and families deprived as a result of a natural disaster in a presidentially designated stricken area.

Food Stamps are provided to persons in eligible households at no cost. Eligibility is based on income, resources and the number of persons in the household. Stamps may be used to purchase food at any grocery store authorized to participate in the program by the U.S. Department of Agriculture.

Donated Commodities are shipped by the U.S. Department of Agriculture to DHS for distribution to school lunch, child care, summer camp and special food programs; charitable and correctional institutions; and nutrition programs for the elderly.

Service Programs

Rehabilitative Services enable handicapped persons to prepare for employment or to return to work. The program involves testing and evaluation of abilities, medical treatment, vocational training, counseling and guidance.

Visual Services provided for blind and visually impaired persons are home teaching; an optical aids clinic; a vending facility program; and a Library for the Blind and Physically Handicapped, which has a radio talking book network and circulates talking book machines, records, and braille and large-print books.

The Special Unit on Aging administers funds under the federal Older Americans Act. Examples of unit-sponsored programs are multi-purpose senior citizen centers; congregate meals; legal counseling; chore, homemaker and home repair projects; escort and transportation services; and information and referral. The unit also administers federal Urban Mass Transportation funds in Oklahoma to purchase vehicles for non-profit agencies which serve elderly and handicapped persons.

Services to Adults and Families help clients obtain or keep jobs; help them obtain health services; provide protective services for the aged and disabled; and offer services such as home maintenance aides to enable persons to remain in their own homes.

Child Welfare includes adoption services; foster care; day care; health-related services; child abuse and neglect prevention; licensing for child care and placement agencies, day care centers and homes; and placement for children in DHS custody.

Court Related and Community Services is a statewide juvenile justice and delinquency prevention program of intake, probation and preventive services for the 74 Oklahoma counties without statutory juvenile bureaus. CRCS provides institutional parole services for all counties. The department also funds community youth service agencies and shelters throughout the state.

The Child Support Enforcement program is responsible for obtaining child support payments from absentee parents. A person does not have to receive public assistance to be eligible for this service.

Hospitals & Institutional Programs

The State of Oklahoma Teaching Hospitals, Oklahoma City, are Oklahoma Children's Memorial Hospital primarily serving persons under 21 years; Oklahoma Memorial Hospital serving adults; the Don H. O'Donoghue Rehabilitation Institute serving eligible persons; and the Child Study Center providing outpatient diagnosis, therapy and training for children with developmental and neurological problems.

Schools for the Mentally Retarded are the Hissom Memorial Center, Sand Springs; Enid State School and Pauls Valley State School. They admit children who can benefit from intensive programs. DHS provides other services to retarded persons who are not eligible for school admission.

Schools for the Blind and Deaf are Oklahoma School for the Blind, Muskogee, and Oklahoma School for the Deaf, Sulphur. They offer resident education and special services to children from preschool through high school age.

The Okmulgee Rehabilitation Center offers comprehensive services for the severely disabled who can benefit from its program.

Lloyd E. Rader Children's Diagnostic, Evaluation and Treatment Center, Sand Springs, conducts a short-term diagnostic and evaluation program to determine the most suitable placement for a child committed to DHS as being deprived, delinquent, or in need of supervision. Facilities include an intensive treatment center for severely disturbed delinquents.

Children's Homes give care and treatment to deprived children. They are Whitaker State Children's Home, Pryor, and the Oklahoma Children's Center, Taft.

Training Schools are Central Oklahoma Juvenile Treatment Center, Tecumseh; Helena State School; and Boley State School. They conduct educational and treatment programs for delinquents and children in need of supervision.

Child Welfare Emergency Shelters and Group Homes. Two emergency shelters giving temporary haven to abandoned and neglected children and two group homes for deprived girls are located in Oklahoma County and Tulsa County.

Community-based Youth Homes operated by Court Related and Community Services are a pre-institutional home for boys in Lawton, a post-institutional home for boys in Tulsa and a post-institutional home for girls in Oklahoma City.

Lake Tenkiller Camp provides camping opportunities for children in DHS custody and others in DHS hospitals and institutions. A staff is in residence from May to November, and programs are geared to the therapeutic or other special needs of individual groups.

Publication of the *1980-1981 Annual Report* is authorized by the Oklahoma Commission for Human Services in accordance with federal and state regulation. It is printed once each year by the Department of Human Services, L. E. Rader, Director of Human Services, and is distributed to DHS Offices, legislators, the news media, and others on request, at a cost of $15,427.96 for 3,715 copies. Editorial Office: P.O. Box 25352, Oklahoma City, Oklahoma 73125. Contents may be freely quoted.

DHS Pub. No. 81-70

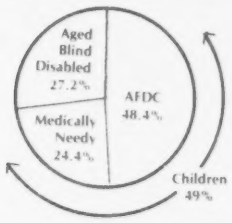
People in Human Services*

MEDICAL PROGRAMS 250,000

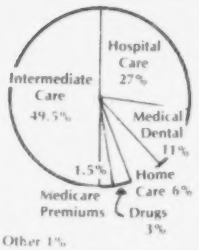
Medicaid and Crippled Children's Services went to 250,000 Oklahomans. Half were children.

An estimated 12,000 vendors and their employees provided the type of services they received.

Medicaid Recipients



Medicaid Services



360 Nursing Homes

200 Hospitals

4,000 Physicians, 1,200 Dentists

5,000 NTMC Providers

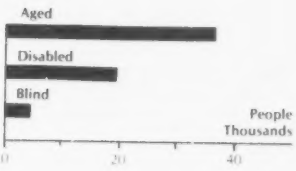
1,300 Pharmacists

ASSISTANCE PAYMENTS 190,000

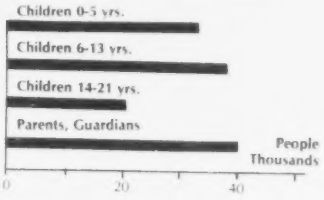
State supplemental payments were made to almost 57,000 aged, blind and disabled persons.

The federal-state Aid to Families with Dependent Children program served 90,000 children and their 40,000 parents or guardians.

Aged, Blind, Disabled



AFDC Families

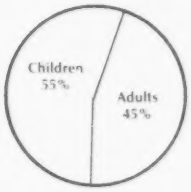


FOOD PROGRAMS 890,000

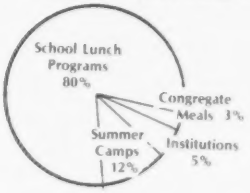
Food stamps were issued to 166,000 households with 460,000 persons. Almost 2,400 food stores were certified by the U.S. Department of Agriculture to accept them.

Food commodities were delivered to over 1,900 schools with an average participation of 370,000 children. Also included were 157 Congregate Meals Programs, an aging service with 30,000 participants.

Food Stamps



Commodity Distribution



SERVICE PROGRAMS 450,000

Almost 50,000 disabled over age 16 received evaluation, testing, counseling, medical care, job-related training and other rehabilitative and visual services.

Child Welfare served 21,000. Half were investigations of child abuse allegations; 3,700 cases were confirmed.

About 11,000 youth received court related and community services. Of these referrals, workers supervised 5,000 probations and 2,000 paroles or community placements.

Contract services under Title XX were provided by 40 youth service centers of which 29 had emergency shelters.

Half of the 49,000 adults receiving social services were AFDC parents; 18,000 were in work training programs. More than 31,000 children received day care.

Over 100,000 elderly were served in programs funded through the Special Unit on Aging.

Child Support Enforcement had 123,000 cases in 1981, and about 94,000 cases were assigned to District Attorneys covering 60 counties.

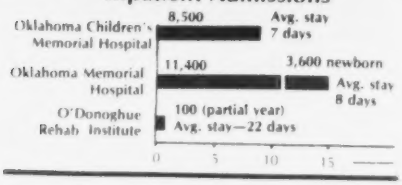
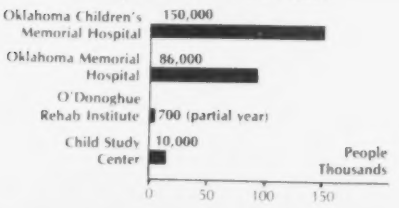
OKLAHOMA TEACHING HOSPITALS
270,000

Inpatient Admissions



Outpatient Clinic Visits



Total: 23,600

The county residence of inpatients admitted to the three teaching hospitals is shown at right. Over 300 were from out-of-state.

SCHOOLS FOR THE MENTALLY RETARDED
2,300

More than 1,800 children and young adults were in residence at the three schools. The average stay was nine years for residents who were discharged in 1981. About 120 were admitted, and over 350 evaluations for services were completed.

Enid State School 675
Hissom Memorial Center 580
Pauls Valley State School 581

HOMES, SCHOOLS, CENTERS, SHELTERS
6,000

About 2,200 youths 10 to 18 years old resided at two children's homes, three training schools and the diagnostic, evaluation and treatment center during 1981. The daily average in residence was 640, and the average stay was 6.3 months.

About 250 children were enrolled for the school year at the schools for blind and deaf.

Emergency shelters in Tulsa and Oklahoma City cared for almost 2,000 children of all ages with an average daily 85 in residence. The average stay was 15 days.

Two Child Welfare group homes served about 40 girls with an average daily residence of 14 and an average stay of 5 months. Seven Court Related and Community Services group homes served 220 juveniles with an average daily residence of 65 and an average stay of 7 months.

Another 1,500 dependent children were in 25 private and voluntary institutions.

Human Services in 1981

The fiscal year 1981 was the most productive and eventful year in the history of the Department of Human Services.

DHS services benefited an estimated one out of three Oklahomans—more than one million persons.

Improvements and modifications in the 30 major human service programs resulted in record levels of service delivery with little added administrative support.

Twenty-six years of legislative transfers ended as major funding changes were made by the Oklahoma Legislature. For the first time, an appropriation of $23 million was made to the Department in addition to the earmarked sales tax and the federal funds to be earned for fiscal year 1982.

The transfers made during this 26-year period, however, resulted in cumulative savings to the state general revenue fund of $655 million in state funds plus $1.1 billion of federal funds earned.

Impending federal funding changes began to take form as Congress overwhelmingly approved the President's budget proposals. Oklahoma will probably lose more than $25 million in funds for human services in 1982 alone.

Despite this gloomy outlook, the department has accomplished with each transfer mandated by the legislature improved programs that will better survive future funding cuts.

Many of the programs have received national recognition for their low error rates, high levels of service delivery per worker, low administrative costs, numbers of successful cases closed, persons returned to productive community living and other accomplishments.

Program expenditures for 1981 were $887 million, of which 56.2% was federal funds and 43.8% was state funds.

Medicaid, under Title XIX of the Social Security Act, was the costliest single program at $339 million. It paid for medical services to almost 240,000 persons of whom 49% were children.

One of the most underfunded programs prior to the transfer in 1980 was Oklahoma Memorial Hospital. Expenditures for operations in 1981 amounted to $23.4 million, about 2.5% of total DHS expenditures. The hospital staff admitted more than 11,000 inpatients, handled 85,500 emergency and outpatient visits and delivered more than 3,500 babies.

Along with the adult hospital transfer, two parking structures still under construction with a bond debt of $4.7 million were transferred from the OU Board of Regents. The structures were completed and the bond debt was paid this year, saving the state $13.8 million in interest payments.

Hospital construction was approved in HB 1713 authorizing the Commission for Human Services to "complete the hospital according to the plan approved by vote of the public in 1968."

Based on planning begun in the early 1960s and previously proposed to the Legislature, construction of additions and improvements to the central building, Everett Tower, began in the fall of 1980 and is almost half completed.

The Old Main building dating back to 1918 was torn down by year's end, "demolishing the deficiencies," as one physician observed, mainly due to inadequate provisions for fire and safety that jeopardized accreditation by the Joint Commission on Accreditation of Hospitals and certification by the Health Care Financing Administration for continued Medicaid reimbursement.

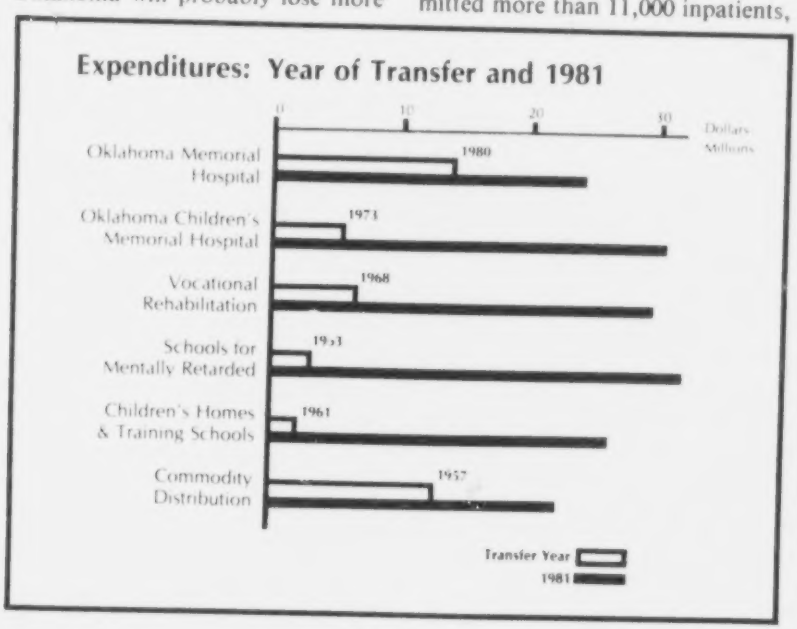
The Medi Flight Oklahoma helicopter transport service was initiated early in the year, and helipads for quick access to both the children's and adult's emergency treatment centers are nearing completion.

By the end of fiscal year 1981, the drive for adequate teaching and treatment facilities begun by former medical school dean, Dr. Mark R. Everett, was beginning to be realized. He died in August 1981 at the age of 81.

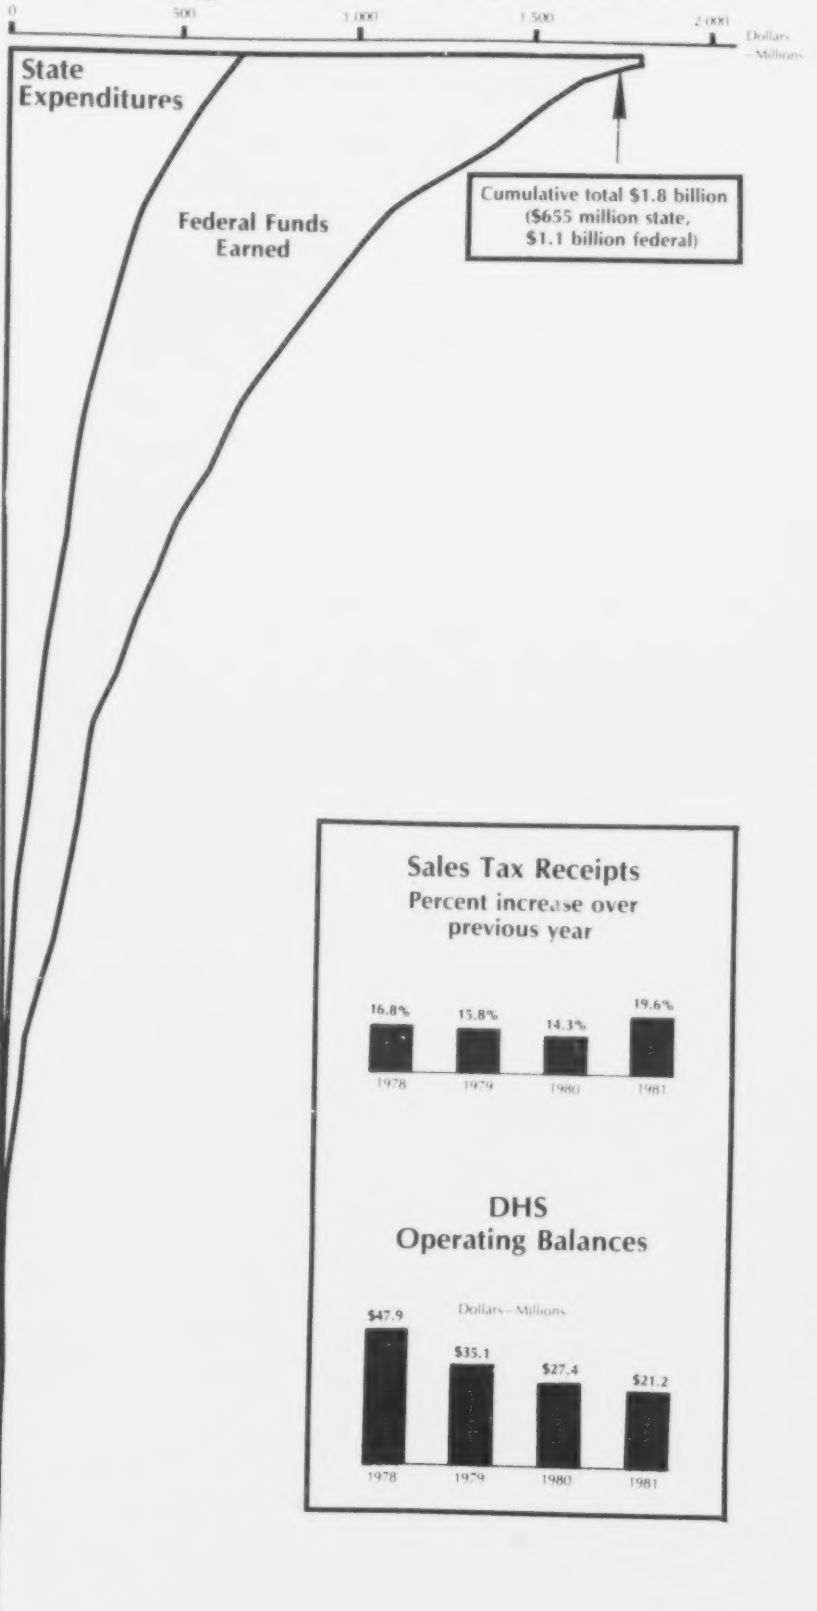
Other legislative mandates included an expansion of the Congregate Meals program at a cost of $2 million. Over 30,000 elderly were served meals at sites throughout the state and in their own homes.

Three sheltered workshop pilot projects for mentally retarded and developmentally disabled were financed and constructed as authorized in HJR 1068.

Several county offices moved or



DHS Expenditures on Legislative Transfers



were planning to move out of old, crowded courthouses as the legislature authorized the payment of rent by DHS.

Added offices were opened or planned in Oklahoma City and Tulsa to alleviate client transportation, parking and service problems. County workers handled more than 500,000 cases involving eligibility for assistance payments, food stamps, medical assistance and providing many types of social services.

After years of operating in old, inadequate facilities, the Tulsa and Oklahoma City emergency shelters for temporarily deprived children now occupy new facilities, the rebuilt former Culbertson school in Oklahoma City and a remodeled former Tulsa Boys Home building. The two shelters provided care for almost 2,000 children in 1981.

The Intensive Treatment Unit at the Rader Diagnostic, Evaluation and Treatment Center opened providing a better method of training the older, more disruptive delinquent boy.

At the Oklahoma Children's Center eight new cottages and remodeled support facilities were fully operational at the beginning of the year as the old Institute for Deaf, Blind and Orphan Children, taken over by the state in 1909 and DHS in 1961, was completely changed.

A therapeutic program was developed at the Lake Tenkiller Camp, qualifying the facility for Medicaid reimbursement. Multipurpose and maintenance buildings were built and road improvements made. By the end of the camping season, an estimated 12,000 children had visited the camp, including dialysis and leukemia patients, deaf, blind and mentally retarded children as well as residents from state homes and training schools.

By the end of fiscal year 1981, construction costs since the date of transfer to DHS of the state homes, schools and centers and the schools for the mentally retarded totaled $22.5 million.

The expanding role of rehabilitation in human services was augmented in March 1981, with the formal dedication of the Don H. O'Donoghue Rehabilitation Institute. Administered as one of the Oklahoma Teaching Hospitals, the Institute delivers inpatient and outpatient medical and rehabilitative services to physically disabled children and adults.

The emphasis in Rehabilitative and Visual Services is directed toward the severely handicapped. Of the 8,025 people rehabilitated into employment during 1981, 23% were severely disabled. Services went to almost 50,000 handicapped persons, including more than 16,000 new referrals, and counselors ranked high regionally and nationally in numbers served and rehabilitated per counseling unit, in caseload size and in low administrative costs.

In all programs administered by DHS, referral systems are organized so that a client's needs may be resolved at minimum cost to taxpayers.

An AFDC mother, for example, may be referred to Rehabilitative Services, Work Experience, Medical Assistance, Child Support Enforcement, Food Stamps, Energy Assistance, Social Services and others as necessary. She may seek treatment at Oklahoma Memorial Hospital.

Her child may receive Child Welfare Services, Social Services, Court Related and Community Services, Institutional Services, Crippled Children's Services or Medical Assistance, Rehabilitative Services and others as necessary. The child may also be treated at Oklahoma Children's Memorial Hospital.

This integration of programs resulted from the need to effectively manage and economically deliver human services for the citizens of Oklahoma. ■

New Funding Era Begins July 1982

A new era of funding human services will begin July 1, 1982.

The first session of the 38th Legislature changed the method of funding that has existed since the Department was created in 1936 by vote of the people.

No longer will the 2% sales tax go into the State Assistance Fund to be allocated to the various programs by the Oklahoma Commission for Human Services.

HB 1218 provides that beginning July 1, 1982 the sales tax will be placed in a newly-created Human Services Fund in the State Treasury to be appropriated by the Legislature. The only expenditures that can be made from that fund will be those directly appropriated by the Legislature.

Agencies that operate on appropriated funds can spend only one-twelfth of their appropriation each month. Quarterly allotment requests must be submitted to the State Budget Office before the start of each quarter.

The legislative appropriation from the Human Services Fund will be limited to the estimate of sales tax revenue made by the State Board of Equalization. If sales tax collections exceed the amount of this estimate a surplus would accumulate in the Human Services Fund before the end of the fiscal year June 30, 1983. The 1983 Legislature could make a supplemental appropriation from this surplus late in the fiscal year, or the surplus could carry over and become available for appropriation for the next fiscal year.

HB 1218 did not abolish the State Assistance Fund. It merely provides that earmarked state taxes now going to this fund will be placed in the new Human Services Fund July 1, 1982.

The bill also re-earmarks 3.5% of the sales tax for human service programs. This change became effective with passage of the bill. The 3.5%, estimated to total $13 million annually, was placed in the General Revenue Fund during the administration of Gov. David Boren.

On the final day of the session the Legislature passed HB 1001 which exempts prescription drugs from the sales tax effective Jan. 1, 1982. It is estimated this exemption will reduce Human Services revenue $8 million per year.

Earlier in the session the Legislature passed SB 357 appropriating $23 million to the Department from the General Revenue Fund. This enabled the

Department to implement the Hay Study and adopt new pay classifications for some 10,000 classified employees July 1. The Department also granted a 12% maximum pay raise to 3,200 unclassified employees, as mandated by the Legislature.

Legislators said the $23 million appropriation would enable the Department to operate for the first six months of the fiscal year.

Also passed by the session was SB 326 which provides for legislative review and approval of applications for federal financial assistance filed after Oct. 19, 1981.

The Legislature passed HB 1234 which makes the Department of Human Services subject to the Budget Act with limitations on intradepartmental fund transfers.

Legislation 1951 to 1981

1951—Aid to the Disabled (HB 451); Old Age Survivors and Disability Insurance collection for state and political subdivisions (HB 64);

1953—Children's Agency Licensing Act (SB 338); Uniform Reciprocal Enforcement of Support ct (HB 971);

1955—Vocational Rehabilitation funded by $175,000 from sales tax (HJR 522);

1957—General Assistance and Commodity Distribution (HB 530); Medical Care Program (SCR 17);

1959—Crippled Children's Program (SB 20);

1960—Medical Assistance to the Aged (Atty. Gen. Opinion 10-18-60);

1961—Two state homes for dependent and neglected children, four correctional schools for children (SB 316, HB 883 and 884);

1962—Cuban Refugee Program (PL 87-510);

1963—Three schools for the mentally retarded, $4 million to State Department of Mental Health (HB 789);

1965—School for the Blind, School for the Deaf (SB 474); Work and Training (HB 870); Special Unit on Aging, Older Americans Act (PL 89-73); Child Abuse Reporting Law (SB 18);

1966—Medical care program expanded to include needy of all ages (HB 566);

1967—Department of Corrections funded by $500,000 (HB 566); Charities and Corrections funded by $175,000 (HB 921);

1968—Vocational Rehabilitation (SB 639);

1969—Library for the Blind and Physically Handicapped (HB 1103);

1970—Oklahoma Children's Center South Campus, formerly Taft State Mental Hospital (SB 455); Developmental Disabilities Act (PL 91-517);

1972—Food Stamp Program (HB 1403); Lloyd E. Rader Children's Diagnostic and Evaluation Center (SB 374); Eastern Oklahoma Tuberculosis Sanatorium funded by $90,000; Oklahoma General Hospital funded by $356,000 (HB 1568);

1973—Oklahoma Children's Memorial Hospital (SB 316, HCR 1062, SCR 89);

1974—Enlargement of Oklahoma Children's Memorial Hospital to provide general and specialized care for persons under 21 years (SB 694);

1975—Vendor Drug Program (SJR 9); statewide juvenile justice and delinquency prevention service (SJR 13); Title IV-D child support enforcement (PL 93-647); Indochinese refugee resettlement and aid program (PL 94-23, PL 94-24); Title XX Social Services (PL 93-647); Work Experience (HCR 1010); Individual or Family Grant Disaster Assistance Program (HB 1121); Statewide funding to areawide agencies on aging for support services to Senior Oklahomans (HB 1587);

1976—Statewide funding for community youth service centers (SJR 56); authorized kidney transplant services at Oklahoma Children's Memorial Hospital for persons over 21 (SJR 58);

1977—Protective Services for the Elderly (SB 309); Incentive payments to adoptive parents of hard-to-place children (SB 336); Administrative procedures to establish child support obligations (SB 348); Workers' Compensation Court referrals to the Division of Vocational Rehabilitation (HB 1228); SSI Disabled Children's Program (PL 94-566);

1978—Inspection, certification and advocacy responsibilities for eleemosynary institutions and organizations (HB 1478); Food Stamp Act of 1977 (PL 95-113); Ombudsman services for Older Oklahomans (PL 95-478);

1979—Vendor Drug Program expanded for all categories (HJR 1017).

1980—University Hospital transferred, renamed Oklahoma Memorial Hospital (HB 1713); Financing and construction of sheltered workshop pilot projects for mentally retarded and developmentally disabled (HJR 1068); Interpreter services for deaf and hearing impaired (SB 503); Energy Crisis Assistance Program (Section 202, Federal Economic Opportunity Act of 1964 and PL 96-126); Emergency utility assistance (HJR 1052); Low-Income Energy Assistance Program (PL 96-223); Additional name: Department and Director of Human Services and Commission for Human Services, for Department of Public Welfare, its Commission and Director (SJR 46).

1981—Exempted certain prescription drugs from the state sales tax (HB 1001); Appropriated $23 million to assure continuation of current level of services (SB 357); Created the Human Services Fund into which sales tax will be paid and from which the Legislature will appropriate funds effective July 1, 1982; Re-earmarked 3.5% of sales tax for DHS programs effective with passage (HB 1218); Local Foster Care Review Act requiring DHS to track all deprived children removed from their parents by court order, whether in custody of DHS or other agencies, to assure the periodic review of the child's placement by local boards and the courts (HB 1231); Made DHS subject to the Budget Act with limitations on intradepartmental fund transfers (HB 1234). ■

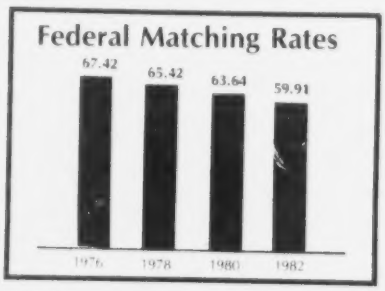
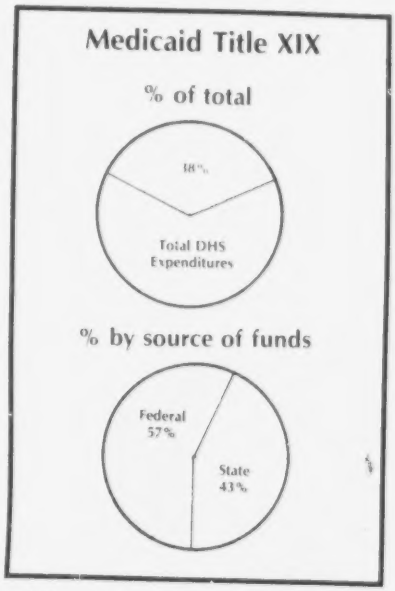
Medicare Part B premiums	4,826,476

—Fiscal 1981

Medical care for the needy is the Department's most expensive program. Most of the services are paid with Medicaid reimbursement of $63.64 per $100 of state expenditures. This rate is authorized by Title XIX of the federal Social Security Act and was scheduled to drop to $59.91 reimbursement per $100 as of October 1, 1981. The rate of federal matching inversely reflects the ratio of each state's per capita income to the national average, with no state receiving less than $50 in federal funds per $100 spent.



Other components of DHS medical care are Crippled Children's Services, Vocational Rehabilitation, Medicare administration for physicians' services to DHS clients and refugee assistance medical care . The latter two are reimbursed 100% by the U.S. Department of Health and Human Services. All persons who receive cash assistance grants from DHS are eligible for Medicaid coverage, as are many who do not receive grants but who qualify for services as medically needy.



The reasons for the high cost of Medicaid are well documented. The incidence of disabilities, illness and infirmities is disproportionately high in the population group covered. As of June 1981, some 17,000 were in intermediate care facilities which are commonly termed nursing homes, although the facilities are not qualified to provide skilled nursing care. At a rate of $25 per day, a bill to DHS for the full month of June would have been $750 per person, plus the cost of physicians' services, prescribed drugs and other services. This amount compares with an average AFDC grant in June of $243 and with an average grant of state supplementation of $64. Among those for whom DHS paid inpatient hospitalization, the average payment to the hospital was $1,119. More is paid for the single item of intermediate care than for all DHS cash assistance grants combined. In addition, the medical care portion of the consumer price index continues to rise faster than the overall CPI. In June 1981 the CPI was 271.3, but the medical care portion of the CPI was 291.5. That is, prices are 171.3% higher, on an average, than in 1967, but the price of medical care has risen 191.5%.

Statutory Background

1957-PL 84-880, first coverage of life- and sight-endangering illnesses.

1959-PL 86-778, first coverage of the medically needy (the Kerr-Mills bill).

1966-PL 89-97, Medicaid and Medicare enacted (1965) and implemented in Oklahoma by HB 566.

1967-DHS became its own carrier for Medicare Part B coverage (physicians' services).

1973-PL 92-603, Medicare extended to most DHS blind and disabled recipients under age 65.

1975-SJR 9, beginning of the vendor drug program to DHS clients covered by Medicaid.

1979-HJR 1017, vendor drug program expanded to include all Medicaid-eligible persons.

Medical assistance has grown in response to public demand for relief from the burden of medical costs. Such demand is the result of several factors: the aging of the population and its more likely need for hospital and long-term care, the depletion of savings to meet costs of medical care, a decline in purchasing power among those who otherwise would be expected to provide for their infirm relatives, and statewide needs which were unmet prior to DHS funding. Examples of the latter include the declining conditions and programs at the state institutions for the mentally retarded prior to assignment to DHS, the need to revamp and upgrade Crippled Children's Hospital and University Hospital at the time of their transfers and absence of a prescribed drug program for DHS clients prior to 1975.

Medicaid comprises the following areas of reimbursement:

(1) services to eligible persons;

(2) Part B medical insurance premiums under Medicare as paid on behalf of eligible clients in the adult programs of welfare grants;

(3) coinsurance and deductible portions of Medicare claims involv-

ing eligible persons for whom DHS pays the Medicare Part B premiums and for categorically needy persons who would be eligible for grants if not living in nursing facilities; and (4) administrative costs of the Medicaid program.

Program Developments

DHS made few changes this year in the scope of its medical programs, mainly because of continuing increases in the cost of services and because of the pending reductions in federal financial participation. States are continuing studying ways to reduce both the scope and cost of Medicaid in view of the recently enacted federal budget cuts. There were minimal increases in almost all reimbursement fees for participating providers. Because of a change in federal regulations, claims for medical services must be received by DHS within 12 months from the date of service in order to be compensable for Medicaid. This limitation has led to greater initiative in third party recovery activities. Much staff time has been directed towards improving processing and payment procedures.

The scope of Medicaid services is regulated by the Oklahoma Commission for Human Services. The Commission solicits the recommendations of its Advisory Committee on Medical Care, on which the various state medical provider associations are represented. The committee also includes representatives of the general public, clients and others who want to design the best medical programs possible within available funds.

Non-Technical Medical Care

The Non-Technical Medical Care program continues to grow. The program is designed to provide care to infirm clients in their own homes, thus relieving the demand for nursing home space and affording an alternative to long-term confinement away from home. The clients numbered 6,908 on June 30, 1981. Seventy-six nurses teach the providers and manage the plans of care. During the year the nurses made 57,951 home visits, reviewed 396 nursing homes, prepared 52 nursing assessments and assisted with 25 Crippled Children's clinics. Altogether, 6,921 providers attended in-service disease- or condition-oriented classes. There were 1,270 providers graduated from the 20-hour course of instruction in non-technical medical care. Non-technical medical care costs averaged $265 per client in June, in contrast with a monthly average of $681 per client for whom DHS reimbursed intermediate care facilities. ■

Physicians	146,740.12
Dentists	193,599.83
Other care	1,149,103.16
	–Fiscal 1981

The Crippled Children's Program, which earns about 34 cents in federal reimbursement per $1 of state expenditures for health services, is an adjunct to Medicaid. Because of the less favorable repayment rate, DHS does not ordinarily use the Crippled Children's Fund to pay for services which are compensable under Medicaid. The program is used for necessary auxiliary services and care given to needy persons not covered by Medicaid. Because of the Attorney General's opinion this year that county Crippled Children's funds are unconstitutional — an opinion affirmed by the State Supreme Court — payments from county funds for medical services for persons under 21 have been discontinued.

In determining eligibility, DHS uses the broad legislative directive to serve children who are crippled, who have conditions leading to crippling or who are otherwise handicapped. The conditions must be amenable to treatment. Family income and capital resources needed for a reasonable standard of living are not considered as available for medical expenses in the determination of need. DHS considers the family size, income, resources, debts and other family health problems as well as the child's diagnosis and the estimated length and cost of treatment. State law requires that DHS have an adequate cash flow to administer the program.

Because of the liberal definition of crippling, care is not restricted to orthopedic problems but covers a wide range of disorders. Common problems include respiratory and digestive ailments, dental problems and congenital malformations. There are somewhat fewer cases of fractures, burns and diseases of infancy. Fewer than 20% of the children received inpatient or outpatient hospital care this year. The most common services included dentists' and physicians' care, appliances and prostheses, and medications. Services by intermediate care facilities for the mentally retarded accounted for 22.6% of fund outlays. Fewer than half of the children are from metropolitan counties, although Oklahoma Children's Memorial Hospital, Oklahoma City, is the most important service center in the program. Race and sex distributions reflect those in the overall population of Oklahoma youth.

Statutory Background

1917-First legislation in Oklahoma for statewide care of crippled children.

1923-Courts directed to determine applicants' financial need for the program.

1927-Age limit for the program raised from 18 to 21 years, with various hospitals approved as providers.

1935-Enactment of a law creating the Oklahoma Commission for Crippled Children.

1936-The Oklahoma Social Security Act, with 0.5% earmarked from state sales tax revenues for the program. The rate later raised to 1%.

1959-SB 20 abolished the Commission and assigned the program to DHS, with a minimum of $1.25 million per year specified.

1964-The minimum expenditure for the program was raised to $1.8 million.

Table 4 indicates the amounts specified by the Legislature for DHS state funding. Included is $37.6 million for the Crippled Children's Program from 1959 through 1981. This amount is state money designated by law, but actual DHS expenditures since 1959 have exceeded $49 million with more than $15 million earned in federal reimbursements.

The program's statewide outreach includes diagnostic and treatment clinics. Orthopedic clinics were held in Muskogee, Lawton and Shattuck. Pediatric cardiology and rheumatic fever clinics were held in Muskogee and Sallisaw. ■

Medicare Payments

DHS acts as its own carrier for Medicare Part B, an arrangement that is unique among the states.

DHS processed and paid 375,000 Medicare Part B claims for individuals who were eligible for Medicaid and Medicare, Part B. Part B payments, for which the state receives 100% federal reimbursement, include physicians' services, ambulance services, rental and purchase of durable medical equipment and other non-institutional services.

Oklahoma had the nation's lowest error occurrence rate for carrier claims processing in 1980. Oklahoma's error rate was 4.2%, compared with a national average of 9.1%. ■

Disability Insurance

The DHS Disability Insurance Unit was started in 1955 by federal directive to adjudicate Oklahoma applicants for Social Security Disability Insurance benefits. To that duty has been added the adjudication of applications for federal Supplemental Security Income as based upon disability.

The unit documents each case record with medical evidence and makes its decision from federal guidelines as to both medical and vocational factors of disability. Referral to the DHS Division of Vocational Rehabilitation is automatic. Appeals of negative decisions may be handled by reconsiderations, hearings and court procedures.

The unit conducts its own quality assurance reviews of determinations and verifies that benefits are not paid erroneously. The Social Security Administration makes a post-adjudicative sample review. Linkage with SSA's computer files enables the unit to release notices of approval or denial of benefits and perhaps to start payment procedures.

The unit processed 36,375 claims this fiscal year, with all costs paid from federal funds. ■

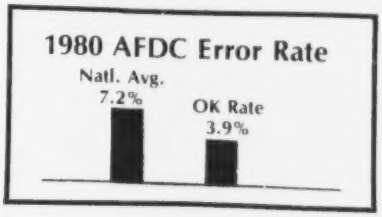
	— Fiscal 1981

In its first 20 years the Department of Human Services was almost exclusively dedicated to programs of public assistance and child welfare. The agency relied heavily upon federal matching funds as authorized by the Social Security Act of 1935. Public assistance began as "relief" or welfare grants to some of the destitute victims of the Great Depression. The first grants of $5 per month were issued to 37,000 elderly persons in the fall of 1936. The term "direct grants" means that money is given to eligible recipients. It is not an earned benefit or annuity, nor is the grant in any form other than a warrant redeemable for cash; for example, it is not paid to a medical vendor, and it is not food commodities or food stamp coupons. Energy assistance is included in the $151.5 million direct grant total above since warrants are issued to the client or to the energy vendor on the client's behalf.

DHS has far surpassed its original function of direct grants. The $151.5 million in direct grants is only 17.1% of total Fiscal 1981 expenditures of $887 million and is exceeded by payments to intermediate care facilities, or nursing homes. The other chapters of this *Annual Report* cover the agency's many other functions, most of which have been added since 1957. If an unduplicated count could be made of all persons who benefit from DHS programs, from Social Security collections and school lunch programs to vocational rehabilitation, schools for the retarded and area-wide planning for the elderly, more than 900,000 Oklahomans likely would be represented. Such a count would include public assistance recipients, and would also include juveniles in DHS custody, non-grant petitioners for child support enforcement, those provided social services as income eligibles or without regard to income, non-grant recipients of Medicaid coverage, non-grant food stamp recipients, applicants for Disability Insurance benefits and patients at the State of Oklahoma Teaching Hospitals.

Indirect beneficiaries could be added to this estimate. Some examples are the families of vocational rehabilitation clients, the children of non-AFDC mothers for whom child support was obtained, and the dependents of workers whom OASI contracts have been negotiated, processed and maintained by DHS. By conservative estimate, probably a million Oklahomans - a third of the state's 1980 population of 3 million - have benefited either directly or indirectly from agency programs.

When a person applies at a DHS county office for welfare grants, food stamps or Medicaid benefits, the application is processed by the Division of Assistance Payments. There is a county office in each of the 77 counties. The client must satisfy all appropriate conditions of eligibility, set forth by the Oklahoma Commission for Human Services in compliance with federal guidelines and requirements as verified by field investigations. Ongoing field reviews are made if the client continues to receive benefits. Proof of the state's low error rates in these programs rests in quality assurance reviews: only some $3.90 per $100 issued in AFDC is in error, and only $1.80 per $100 in Medicaid payments is in error. These finding are among the lowest anywhere and are verified by federal audits. DHS makes no grant based solely upon a client's claim.

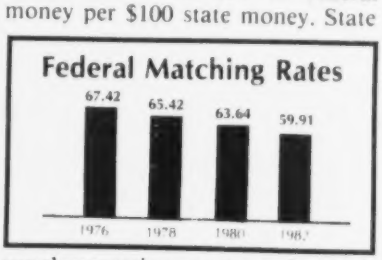


The division routinely uses other DHS divisions and units as resources. Documentation of eligibility is aided by the Medical Evaluation Unit, the Disability Insurance Unit, the Administrative Review Unit, the Psychological Unit, the Appeals Unit, the Division of Child Support Enforcement and the Office of Inspector General. The division fulfills work registration requirements for AFDC in cooperation with the Division of Services to Adults and Families and the Oklahoma State Employment Service.

Direct Grant Programs

The DHS direct grant programs earn various rates of federal reimbursement. Indochinese Refugee Assistance is totally reimbursed from federal funds.

AFDC and its foster home care and emergency grants earn federal reimbursements of $63.64 per $100 spent. In October 1981 the federal return rate will drop to $59.91 per $100 of state expenditures. The administrative costs of those grants continue to earn $50 in federal money per $100 state money. State supplementation grants to the aged, the blind and disabled are in addition to the federal Supplemental Security Income program of the Social Security Administration and earn no federal funds. General Assistance also earns no federal funds. The federal money is reimbursed to the state rather than matched to state money. DHS spends state revenues first, then earns its federal share to be distributed to the best overall benefit of the needy; this allocation carries out the intent of various legislative joint resolutions. ■

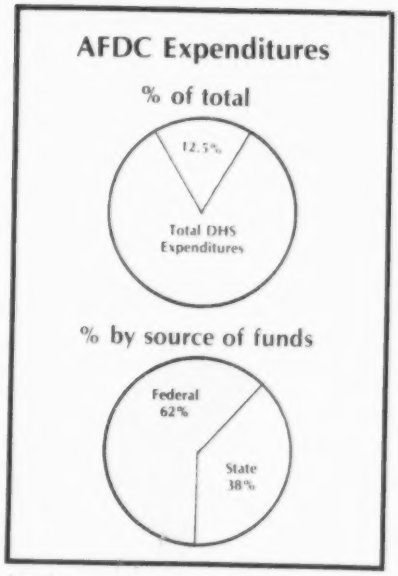


Assistance Payments

State supplementation and the federal SSI program have overlapping caseloads. In December 1980, 67,250 aged, blind or disabled Oklahomans received SSI benefits; 56,407 of them also had state supplementation grants; and 2,644 of the 56,407 were in state programs but not SSI. Therefore, 53,763 clients received aid from both sources, and 13,487 had SSI but no state supplementation. There were 69,894 adults who benefited from at least one program. Oklahoma is one of 22 states that have state-administered supplementation, with

conditions of eligibility more stringent than in SSI. The aged, blind and disabled recipients and their spouses are eligible for Medicaid.

AFDC earns partial federal reimbursement from the U. S. Department of Health and Human Services. Repayments are authorized by Title IV-A of the federal Social Security Act of 1935. DHS has for years spent up to three times as much for Medicaid as for AFDC grants, and this year those grants were exceeded by food stamp and food commodity distributions. The Oklahoma Commission for Human Services approved increases in the AFDC standard payments, prior to deductions of net income, effective April 1, 1979. The consumer price index rose 28.3% from April 1979 to June 1981, for an overall loss of some 22.1% in buying power. An AFDC family of a mother and two children with no income qualifies for a monthly grant of $282, the same as in April 1979; but in terms of April 1979 dollars, their effective



buying power has shrunk to under $220 per month.

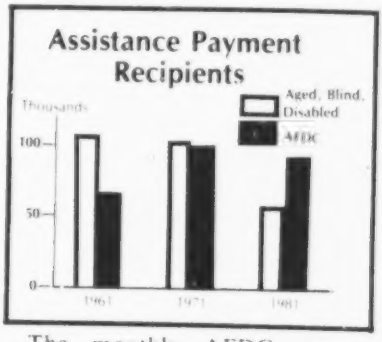
AFDC grants are for the benefit of the children. Most AFDC families are deprived of normal support because a parent is absent from the home and does not contribute toward meeting their children's needs. DHS has many efforts designed to help solve the program of nonsupport; the Work Experience Program and the Work Incentive Program, vocational rehabilitation and child support enforcement. Agency policies and programs are designed to help untrained and undereducated parents and to encourage the children to stay in school.

Energy Assistance

On June 18, 1980, the Governor designated DHS as the administrator of the federal Low Income Energy Assistance Program, which in Fiscal 1981 provided some $10.2 million in special, all-federal grants to the needy for home heating. LIEAP is authorized by PL 96-223 and was preceded in Fiscal 1980 by the Energy Crisis Assistance Program and by $100 additional state grants, under HJR 1052, to state supplementation recipients. Altogether, 72,243 households with 180,917 persons received LIEAP grants this year. About one-half also received state supplementation or AFDC. Eligibility is based upon need and other factors set forth in federal guidelines.

Monthly Average Trends	
Caseloads:	
AFDC	30,859 cases
ABD State Supplementation	55,671 cases
Grants:	
AFDC	$241.71
ABD State Supplementation	63.80

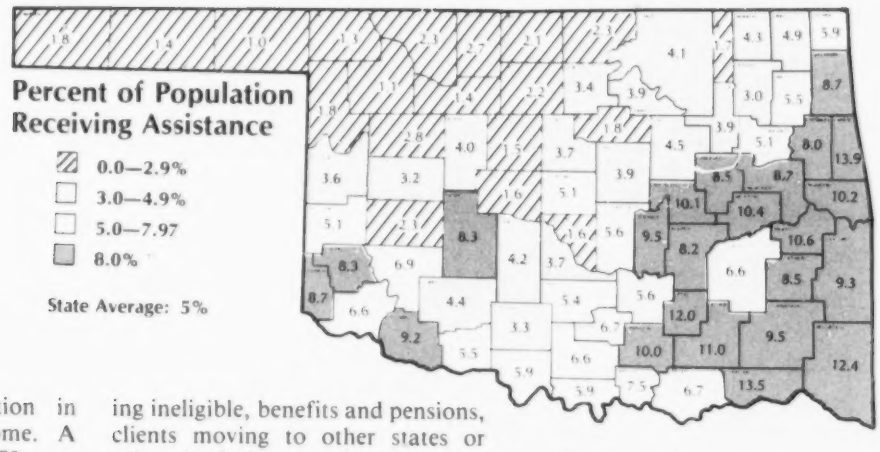
The monthly average of blind and disabled persons receving state supplementation payments was almost unchanged this year from last. Averages of 449 blind and 18,684 disabled clients were on rolls in Fiscal 1981. The monthly average receiving aid to the aged fell to 36,538 cases, a net loss of 4.9% since Fiscal 1980. The caseload has declined for several years. As these recipients die, they are not being replaced one-for-one by other elderly persons. Most of the elderly now have Social Security benefits sufficient to preclude eligibility for aid to the aged. Many persons formerly eligible now are classified as non-grant "medically needy" cases under Medicaid.



The monthly AFDC average caseload included budgeted needs for 90,579 persons, including 24,967 adults and 65,612 children. Although averages of 1,551 more cases (5.4%) and 3,125 more persons (3.6%) received AFDC each month this year than last, the caseload has been in decline since February. AFDC foster home care was paid on behalf of an average of 701 children each month.

Policy Changes

DHS this year reinstated the combination of eligibility and services to provide better and more timely service to clients. The changes were in response to federal mandates. Child-care expenses are now treated



as a work-related deduction in determining net case income. A standard deduction of $70 per month for half-time day care or $140 for full-time care took effect December 1, 1980, and clients may document actual expenses in excess of these standards. Income-producing property associated with a home cannot be excluded from a client's resources, and a prepaid funeral contract may be excluded only if the client has signed an agreement to make it irrevocable.

One vehicle per family is exempt, regardless of value, if it is used for medical services at least four times a year, or for employment purposes or is specially equipped for a handicapped person. Implementation of automatic income and resource eligibility based upon SSI determinations was an important policy change in state supplementation. As of April 1981, federal regulations called for a 36-month limitation, from date of entry, on refugee assistance. Any refugee cases closed by this limitation are reviewed for possible eligibility under other categories.

Application and Case Movement

DHS received 364,498 applications during Fiscal 1981 for participation in various benefit programs, of which 28,858 were for AFDC and 285,947 for food stamps. The Department received 11,269 more applications this year than last, a 3.2% increase. There were 298,365 applications approved and 68,750 denied or cancelled. Included in the case movement were 18,344 AFDC cases opened and 17,482 closed. The most common reasons for closing AFDC cases were employment, children becoming ineligible, benefits and pensions, clients moving to other states or otherwise losing contact with DHS, and requests for case closure from the clients themselves. ■

Emergency Welfare

The Emergency Welfare Services Unit is prepared to help DHS county staff if a national disaster or emergency should occur. If the President declares a disaster in Oklahoma, unit and county staff members will mobilize to provide emergency housing, fund the repair of owner-occupied houses and the replacement of necessary furnishings and meet medical needs. This aid is provided by Public Law 93-288, the Individual and Family Grant Program. No such disasters occurred in Fiscal 1981. ■

General Assistance

House Bill 539 of the 1957 Legislature assigned both the donated food commodity program and the general assistance program to this agency. General assistance grants and administration receive no federal reimbursement, and recipients are not automatically certified for any other DHS services or benefits. A monthly average of 500 cases with 1,264 persons received general assistance in Fiscal 1981. Grants totaled $376,007 for the year, or an average of $62.67 per case per month. Agency policy was changed in Fiscal 1980 to allow the issuance of two checks, normally $35 each, per case per month. ■

Food Stamps & Donated Commodities

Food Stamps

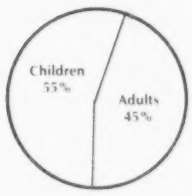
1974-USDA food stamps replaced the food commodity program for family welfare.

1979-PL 96-166 removed the purchase requirement for stamps and authorized coupon mail-out.

DHS is the single state agency in Oklahoma authorized to administer the food stamp program in cooperation with USDA. DHS determines eligibility for issuance, maintains quality control, provides record keeping and accounting and conducts outreach for the program. Clients may have the food coupons sent to their mailing addresses or be issued authorizations to receive coupons at their post office. This fiscal year, 166,179 households with 459,569 persons were issued $81.1 million in coupons. That was some $12.05 million more than in Fiscal 1980, a 17.4% increase. The number of participating households was 5.9% more than last year, and the number of clients rose 5.1%.

There were various policy changes in the Food Stamp program. On July 1, 1980 DHS made a semi-annual adjustment of income standards and coupon allotments. SSI and food stamp joint application processing began on August 1, with SSI applicants or recipients allowed to apply at the SSA office for food stamps. Beginning September 1, food stamp recipients between the ages of 18 and 60—other than those also certified for AFDC or state supplementation—continued to be eligible only if they were enrolled at least half-time in an institution of higher education. On October 1, the maximum resource limit was

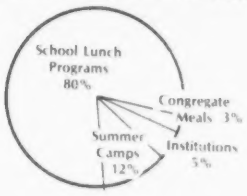
People in Food Programs



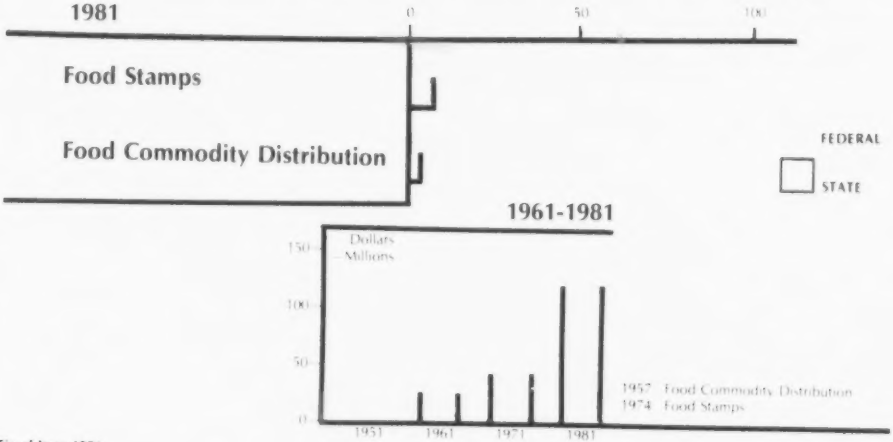
FOOD PROGRAMS 890,000

Food stamps were issued to 166,000 households with 460,000 persons. Almost 2,400 food stores were certified by the U.S. Department of Agriculture to accept them.

Food commodities were delivered to over 1,900 schools with an average participation of 370,000 children. Also included were 157 Congregate Meals Programs, an aging service with 30,000 participants.

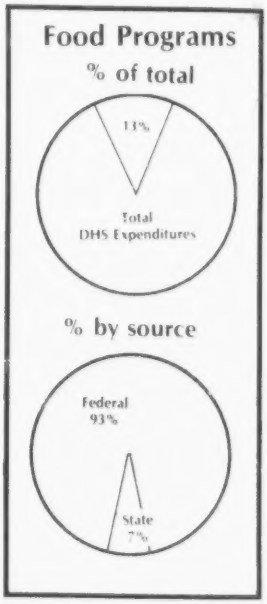


Expenditures for Food Programs



Fiscal Year 1981

Program	Total	Direct Payments	Services	Administration
Food Stamps	**93,642,179.69**	**81,135,976.00**	**9,781,226.97**	**2,724,976.72**
Federal	87,499,747.00	81,135,976.00	5,001,282.64	1,362,488.36
State	6,142,432.69	0.00	4,779,944.33	1,362,488.36
Commodity Distribution	**22,252,427.19**	**20,526,690.40**	**973,885.04**	**751,851.75**
Federal	20,561,940.40	20,526,690.40	0.00	35,250.00
State	1,690,486.79	0.00	973,885.04	716,601.75



lowered from $1,750 to $1,500 for one-person households and for all other households with no one older than 59. The full market value of vehicles used for disabled household members is excluded from resource considerations. Coupon allotments were increased again on January 1, 1981, as were maximum deductions for dependent care and excess shelter cost. Job search requirements were implemented on June 1.

Donated Commodities

The United States Department of Agriculture contracts with the Oklahoma Commission for Human Services to provide commodities for distribution to school lunch programs, charitable and correctional institutions, child care programs, summer camps, special food programs and the nutrition program for the elderly. USDA ships the commodities to DHS warehouses in Oklahoma City, Tulsa and McAlester for monthly deliveries to all counties. The DHS Food and Nutrition Services Unit administers both the donated foods program and the USDA food stamp program.

1957-HB 539 assigned the USDA donated foods program to DHS.

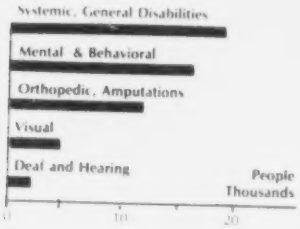
1965-PL 89-73 (The Older Americans Act, Title III) added the nutrition program for the elderly.

1974-Family welfare removed from the scope of the program: see Food Stamps.

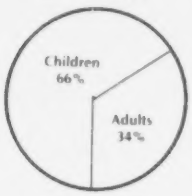
Donated foods this year had a total retail value of $20.5 million, an increase of $5.6 million or 37.8% over deliveries in Fiscal 1980. Commodities went to 1,938 schools with an average lunch program participation of 370,120 persons, to 307 institutions with 18,650 persons, to 154 Title III programs with 12,680 persons and to 214 child care programs with 11,138 persons. One hundred and twenty-nine summer camps with 54,435 persons received commodities, as did 14 special food programs with 5,299 persons. An unduplicated estimate of 420,000 persons were provided meals this year which had been prepared from donated food commodities. ■

People in Service Programs

Rehabilitative & Visual Services



Social Services for Adults & Families



SERVICE PROGRAMS 450,000

Almost 50,000 disabled over age 16 received evaluation, testing, counseling, medical care, job-related training and other rehabilitative and visual services.

Child Welfare served 21,000. Half were investigations of child abuse allegations; 3,700 cases were confirmed.

About 11,000 youth received court related and community services. Of these referrals, workers supervised 5,000 probations and 2,000 paroles or community placements.

Contract services under Title XX were provided by 40 youth service centers of which 29 had emergency shelters.

Half of the 49,000 adults receiving social services were AFDC parents; 18,000 were in work training programs. More than 31,000 children received day care.

Over 100,000 elderly were served in programs funded through the Special Unit on Aging.

Child Support Enforcement had 123,000 cases in 1981, and about 94,000 cases were assigned to District Attorneys covering 60 counties.

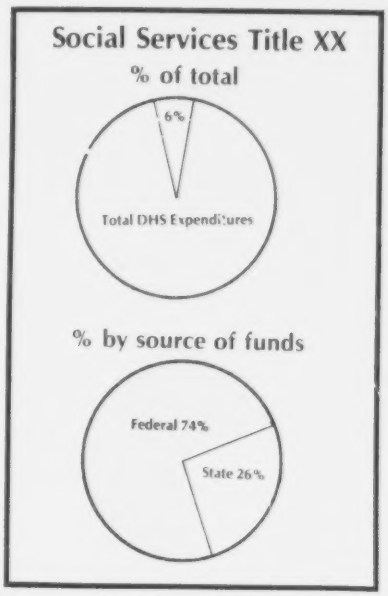
Service Programs

Social Services

Adult beneficiaries	48,907
Child beneficiaries	96,531
	—Fiscal 1981

DHS directly provides or funds social services through child welfare, adults and families and Title XX contract services. Funding is made possible by state sales tax receipts and federal reimbursements under provisions of the Social Security Act, Titles IV-B, IV-C, IV-E and XX. The overall program has several goals: protection and well-being of children, client self-development and self-sufficiency, protection of adults as needed and adequate family relationships and functioning.



Services to Adults and Families

Services to Adults and Families administers programs to aid the development of its clients and to prevent neglect, abuse or exploitation. Activities are either shared with the client or provided in his behalf. Program scope includes family life services, day care, work and training, health-related services, monitoring and staff training.

Family life services are designed to improve clients' social functioning, to prevent family breakdown if feasible alternatives exist and to provide choices circumventing long-term confinement. The components of this program are education, employment, work training, day care, home maintenance help, housing and medical referrals, volunteer help, summer recreation programs, foster care with parental consent, services to unmarried parents, adult protection, money management, counseling, and information and referral. Child day care is intended to minimize abuse and neglect at home and to enable parents to join in therapy or beneficial activities.

Family life may be sustained or strengthened in various other ways. Under terms of the 1977 Protective Services for the Elderly Act, the division helped 749 adults solve problems involving health care, housekeeping, social adjustment and legal matters. Clients included 559 who were 65 or older. The staff made legal intervention for 94 of these clients, including involuntary protection for 73 clients. Altogether, 266 clients were approved for home maintenance services such as housekeeping, food purchase and preparation and personal care. To qualify, the client must be an ambulatory public assistance recipient. Volunteers contribute to adult well-being and family strength by taking children on field trips, visiting shut-ins, helping with transportation and tutoring. A monthly average of 143 volunteers served this year.

Day care services are available to qualified children and adults. Services include the arrangements for and provision of care, certification of the need for care and auditing of vendor compliance. Day care for children may strengthen family life when a parent is ill, in school or working. Specialized day care may be best for a mentally or physically handicapped child. DHS staff members first explore whether relatives are available to give free part-time care. DHS paid $16 million in Fiscal 1981 for child day care. In June 1981, payments were made on behalf of 16,444 children.

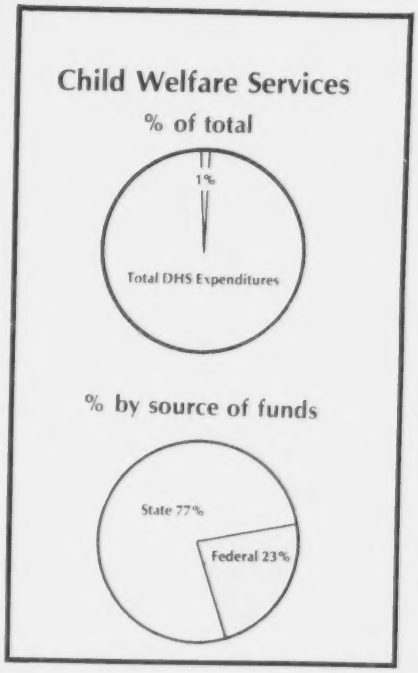
Adult day care has three prerequisites: the client requires it for health, restoration or social needs; the provider center has a Title XX contract; and the center meets minimum DHS standards. The staff and the client work together to define the need for care and what benefits may reasonably be expected. Adult care is often better for the client than confinement in a long-term care facility. DHS this year paid $175,075 for care, with a caseload on June 30 of 900 adults.

Work and Training programs include both the Work Experience Program for volunteer AFDC adults and the Work Incentive Program. Both are designed to improve clients' work histories and employability. Both involve such social services as counseling, developing plans for self-support, helping to find jobs or training, follow-up and possible referral for vocational rehabilitation. There were almost 40,000 job-related services this year. WEP, authorized by the 1975 Legislature and entirely state-funded, this year had 996 adults who volunteered for the program and were paid $6 per day of work to cover expenses. A total of 250 former volunteers got jobs during the year.

WIN is administered jointly by DHS and the Oklahoma State Employment Service. The latter makes job referrals, and DHS provides social services in conjunction with employment. WIN projects are located in 21 counties, and AFDC recipients or applicants must register for possible WIN assignments if they live in one of those counties, unless exempt by agency policy. WIN participants received some 13,400 social services this year and 2,200 WIN clients found jobs.

Health-related services include both child health screening and the federal Supplemental Security Income Disabled Children's program. Services include mail-out notices of screening, information and referral, counseling and support. DHS mailed 37,589 screening notices this year, made more than 59,000 personal contacts to inform children of these exams and gave information, referral and support services to 18,670 clients. Notices of the availability of family planning were mailed to 55,439 families. The SSI Disabled Children's program provides in-home services to severely handicapped children. Altogether, 481 children were referred to DHS, of whom 230 have thus far been contacted and 118 have had plans of service implemented.

The division monitors the delivery of services in order to verify compliance for state and federal funding. The staff reviewed 1,524 service cases this year for compliance. The division also conducts its own program of staff training in conjunction with services offered by the DHS Division of Staff Development. ■



Child Welfare Services

Child abuse investigation was assigned to DHS by the 1972 Legislature. The staff investigates all reported allegations of physical, emotional or sexual mistreatment and neglect of children and maintains a registry. Of 10,109 reports received this year, 3,733 were confirmed. Thirteen children died. DHS works with various groups to conduct training for the detection of abuse. The toll-free number for reporting suspected abuse is 1-800-522-3511.

Preventive and remedial services were given 2,548 children this year. These are children for whom DHS has legal custody or supervision who are not living in foster family homes or adoptive homes. The program attempts to preserve and rehabilitate families. Staff members diagnose problem situations, evaluate potentials for harm to children and give counseling and therapy to family members. Workers may arrange for shelter and other emergency care, and they report the family situation and service plan to the courts. DHS has two emergency shelters, in Oklahoma and Tulsa Counties, which cared for 2,000 children during the year. There are also two group homes for deprived girls, with a combined capacity of 16. Services are available to expectant mothers including arrangements for maternity home care, planning for the baby, and upon request, the relinquishment of parental rights.

Adoption placements may be made for children in DHS custody. The agency this year placed 285 children in adoptive homes, and 221 were in post-placement supervision as of June 30. DHS had 949 completed adoptive studies on file as of that date, together with 584 pending adoptive applications. The staff also completed 772 court-ordered investigations for independent adoptions. Medical subsidies are available to adoptive families to help meet medical expenses not covered by insurance. The staff continues to strive for placements of minority race children and children with handicaps or other problems.

Foster family care averaged 1,364 children per month, with 1,066 children first entering foster homes and 1,558 children leaving care during the year. Only children in DHS legal custody or for whom the agency has parental consent are eligible for such care. Placement is considered to be a temporary solution to the child's living arrangements, as most children eventually return home or live with relatives. Foster care may be necessary in the event of family disruption or if the child requires special medical care away from home. Staff members make plans for such care to ensure that the child's various needs are met, and such plans and placement are reviewed regularly. An advisory committee of laymen also helps in the reviews. DHS continues to recruit homes for future placements, particularly those willing to accept non-whites or older children.

The Interstate Compact on the Placement of Children has been administered in Oklahoma since 1974. The staff received 1,151 referrals this year and placed 749 children, of whom 376 were placed in Oklahoma and 373 were placed out of state. Thirty of the 749 children went to foster homes, 285 to adoptive

homes, 378 to relatives' homes and 56 to group homes and residential centers. DHS closed 557 Compact cases and denied 351 requests.

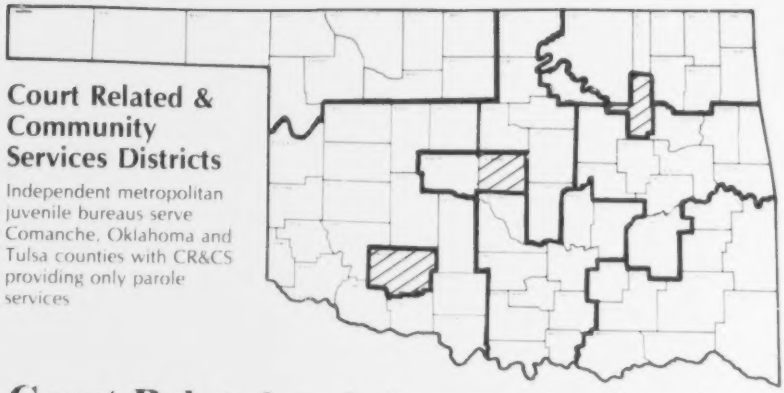
Licensing Services have been performed by DHS since first mandated by the 1963 Legislature. The Licensing Services Unit inspects and certifies child care facilities which meet minimum standards of care. Clients include day care homes and centers, emergency shelters, child care institutions, child placement agencies and adoption agencies.

The unit answers inquiries about care, helps parents find licensed facilities and helps new facilities get started. Staff members conduct training courses and workshops, distribute materials and give technical advice to providers in order to improve the quality of child care. The staff also helps organizations which promote the interests of children.

As of June 30, licensed facilities had a total rated capacity for 53,122 children, including 47,197 children in 1,054 day care centers. Other types included 857 family day care homes approved for 4,332 children, 25 private institutions approved for 1,257 children and 32 emergency shelters approved for 336 children. There were 23 licensed agencies for child placement and 12 certified adoption agencies. ■

Title XX Planning and Contracts

The Title XX Planning and Contract Unit publishes the Title XX comprehensive annual services plan for Oklahoma and negotiates and maintains contracts for the purchase of social services, administrative support and personnel training. Title XX is that portion of the federal Social Security Act amendments which authorizes federal funding for most social services. The unit also negotiates contracts for donations to DHS to be used to support the Title XX program. Agreements currently total $5.5 million for contracted services such as day care, community-based youth services and counseling services from public and non-profit private agencies. Donor contracts total $278,228. ■



Court Related & Community Services Districts

Independent metropolitan juvenile bureaus serve Comanche, Oklahoma and Tulsa counties with CR&CS providing only parole services

Court Related and Community Services

The Oklahoma Commission for Human Services contracts with the State Supreme Court to provide statewide court-related services to juveniles. The Division of Court Related and Community Services processes referrals in 74 counties for juvenile law violators and for those with specified behavior problems. Oklahoma, Tulsa and Comanche Counties have juvenile bureaus which conduct their own intake and probation. After fact finding, the division recommends to the district attorney's office the most appropriate disposition of each case. Intake begins with referral and ends with either informal action by the district attorney or a formal court adjudication. DHS and community agencies provide service.

The division administers both probation and parole. Probation requires that the staff counsels with families and their children, reports services and the probationer's adjustment to the court, and works with the district attorney's office to help non-adjudicated youth. Parole services require that staff members work with youth either in or out of an institution and both before and after community placement. For several years prior to the contract, DHS provided parole services in most counties. During Fiscal 1981, the division supervised 4,886 probations and 2,180 paroles or community placements. Intake services numbered almost 11,000.

The division provides services to three DHS-operated group homes. Each has a capacity of eight youth: a post-institutional home in Tulsa for boys, a pre-institutional home in Lawton for boys and a post-institutional home in Oklahoma City for girls. There are also four contract group homes in Oklahoma City and Tulsa with a total capacity of 46 youth. ■

Psychological Services

The Psychological Unit received 554 referrals this year from various DHS divisions and units, including 476 from Child Welfare services and 32 from Court Related and Community Services. Psychologists handled 465 requests for psychological testing, of which 406 cases were completed as of June 30 and the others were cancelled or continued. There were 2,450 services provided, including consultative conferences, counseling and psychological tests. The large number of testing referrals and counseling requests from Child Welfare indicates an emphasis on direct psychological services to abused children and their families. ■

Developmental Disabilities Planning

The 1963 Legislature also authorized state planning for the retarded so that Oklahoma could qualify for federal grants under PL 88-156 and PL 88-164. Further legislation such as PL 95-602 widened the scope of planning to recognize the developmentally disabled according to their functional limitations. The Developmental Disabilities Planning Council, consisting of 36 members appointed by the governor, approved the state plan which this year called for the approval of 35 subgrantee projects. Studies are underway to evaluate all programs which serve developmentally disabled persons. Construction of three community-based sheltered workshops, authorized by the 1980 Legislature in HJR 1068, was completed during the year. ■

Rehabilitative & Visual Services
74 Rehabilitative Services Offices
9 Evaluation and Service Centers
15 Visual Services Offices and the Library for the Blind and Physically Handicapped

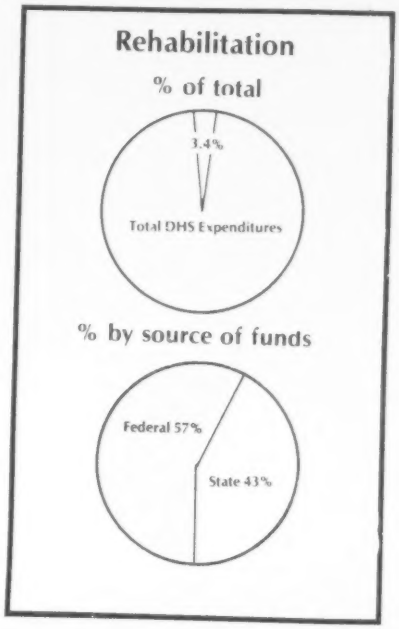
Rehabilitative and Visual Services

These programs were transferred to DHS on July 1, 1968, from the Department of Education (SB 639).

Caseload	**48,834**
Rehabilitative Services	44,116
Visual Services	4,718
Rehabilitated	**8,025**
	—Fiscal 1981

The rehabilitation program is a major effort to provide constructive approaches to the many-sided problems of disability. It signifies recognition of the social responsibility to give disabled citizens opportunities to participate fully in the world of work and society in general. Eligibility for services requires a physical or mental disability which constitutes a vocational handicap. There must be a reasonable expectation that provision of services will enable the client to become gainfully employed. Emphasis is on serving the severely handicapped and those receiving cash assistance grants from the Department. No person is denied services because of race, color, creed, sex or ethnic origin. Of 8,384 assistance recipients served this year, 1,616 were rehabilitated into gainful employment.

DHS works with all agencies and organizations which serve handicapped people. It has a Consumer Advisory Council and numerous cooperative agreements, including agreements with 38 school systems. It uses fee payments, technical consultation and special grant programs. Offices and facilities are in medical and vocational centers, schools for the deaf and the blind, mental institutions, public and technical schools, schools for the retarded, colleges, numerous DHS county offices and elsewhere. DHS administers the Okmulgee Rehabilitation Center, a comprehensive facility for the severely disabled. There are eight diagnostic and evaluation centers, and a vocational training school at Stringtown offers inmates instruction in 14 trades. Other facilities include the agency's Don H. O'Donoghue Rehabilitation Institute, the Rehabilitation Medicine Clinic, and the Low-Vision Clinic at the Dean A. McGee Eye Institute, all in Oklahoma City. DHS has liaison with sheltered workshops, speech and hearing centers and other facilities throughout Oklahoma.



Rehabilitative Services

Caseload	**44,116**
Rehabilitated	7,354
Referrals accepted	14,631
Written programs developed	9,640
	—Fiscal 1981

The Rehabilitative Services Division serves all physically and mentally handicapped persons except those with visual impairments. Other goals besides employment may include homemaking capabilities or independent living. The rehabilitation program may include medical diagnosis, evaluation, restoration, counseling and guidance, training, selective job placement and post-employment follow-up. Other services may include maintenance, transportation, reader services, interpreter aid and various technological aids and devices. Program evaluation and planning are ongoing. Management tools include electronic data processing and detailed state and federal case reviews. Services to eligible clients are prompt and equitable.

Services for the deaf have been improved. A new interpreter program helps the deaf in legal proceedings, contacts with medical facilities and dealings with law enforcement agencies. Special programs for the deaf have been started at Oklahoma State University-Tech, Oklahoma City, and the Moore-Norman Area Vocational Technical School.

Visual Services

Caseload	**4,718**
Rehabilitated	671
Referrals accepted	1,671
Written programs developed	904
	—Fiscal 1981

The Visual Services Division provides traditional and unique services to blind or visually impaired clients. Included are rehabilitation teaching, counseling and adjustment services to newly blinded persons. Services include braille instruction, mobility and orientation, communications, adaptive techniques, activities of daily living and services geared to other problems.

The division supervises a statewide vending facility program, as authorized by the Randolph-Sheppard Act, with 71 facilities and 108 handicapped employees. Gross income totaled $5 million in Fiscal 1981, and net income was $1.2 million. Average net earnings were $12,509 per facility. Other outreach activities include a visual aids clinic; distribution of braille watches, white canes and other devices; and maintenance of a registry of blind Oklahomans.

The DHS Library for the Blind and Physically Handicapped stocks almost 20,000 volumes of large-print and braille books and periodicals. The talking book program makes available for loan more than 57,000 disc and cassette volumes to more than 5,000 users. The radio talking book program has a potential audience of more than 3,000 listeners. It features daily reading of newspapers, magazines and recently published books, together with talk shows, interviews and panel presentations. Programs are broadcast 99 hours per week and are carried by FM sub-bands as a public service. Single-frequency FM radio receivers are made available to eligible listeners at no cost. ■

Speech & Hearing Services

The Speech and Hearing Unit provides both direct and indirect services. Indirect services include consultative and advisory services to other divisions and units and to institutional speech and hearing clinics. Those clinics are at Enid State School; Pauls Valley State School; The Hissom Memorial Center, Sand Springs; the Oklahoma School for the Blind, Muskogee; the Oklahoma School for the Deaf, Sulphur; the Okmulgee Rehabilitation Center; Whitaker State Home, Pryor; Oklahoma Children's Center, Taft; and the L. E. Rader Diagnostic and Evaluation Center, Sand Springs.

The unit also provides quality assurance review and follow-up of communicatively handicapped children being served through the Crippled Children's Program. During Fiscal 1981, the state office staff conducted 645 such reviews.

Direct audiology services are available from the Speech and Hearing Unit at Whitaker State Home, Oklahoma School for the Blind, Oklahoma Children's Center and the L. E. Rader Diagnostic and Evaluation Center.

This year, the unit's state office staff provided 42 speech evaluations, 614 hearing evaluations, 225 tympanometric evaluations, 30 hearing aid evaluations, and six ear impressions. Also provided were 27 hearing appliance services, 50 referrals for additional services and 68 consultations and staffings. Other speech and hearing services are provided at the institutional speech and hearing clinics by the resident staffs.

Area Agencies on Aging

1 North Eastern Counties of Oklahoma
2 SUOA Administered
3 Kiamichi Economic Development District of Oklahoma
4 Southern Oklahoma Development Association
5 Central Oklahoma Economic Development District
6 Tulsa Area Agency on Aging
7 Northern Oklahoma Development Association
8 Areawide Aging Agency, Inc
9 Association of South Central Oklahoma Governments
10 South Western Oklahoma Development Association
11 Oklahoma Economic Development Association

Special Aging Services

The DHS Special Unit on Aging is responsible for administering Titles III and IV of the Older Americans Act of 1965, as amended. The Governor and the Legislature have designated the unit as the focal point for matters relating to the needs of senior Oklahomans. Staff activities are aimed at improving the quality of life for these persons by serving as their advocate and by working toward a comprehensive and coordinated service delivery system. The goal is economic and personal independence and dignity for older persons, particularly those with the greatest economic and social needs.

The unit supports and helps fund 10 area agencies on aging, helps sponsor more than 230 senior citizen centers and coordinates a program of congregate or home-delivered meals for the needy elderly. The area agencies plan and deliver services and advocacy in 70 counties; the other seven counties, in eastern Oklahoma, are eligible for direct grants from the unit.

The meals program served 2.4 million congregate meals this year and 331,293 meals to home-bound persons. The total participation was 30,201 persons in 55 counties. Staff members have been teaching nutrition and meal preparation, training and helping project staff and monitoring the 167 nutrition sites for program compliance.

The unit provides funding to the area agencies on aging, helps in training and monitors various in-home services. There were some 371,400 services this fiscal year, with 40,500 beneficiary seniors. As advocate for the elderly, the unit helps develop grant proposals, solicits news media coverage, prepares audio-visual presentations of in-home services and works with various groups outside DHS—both private and interagency—in joint efforts of advocacy.

The unit helps to fund transportation for the elderly through provisions of the Older Americans Act and the Urban Mass Transportation Act. There are 189 vehicles in operation which were purchased with federal funds, and 49 others are on order. They are used to transport clients to and from senior centers and nutrition sites and to provide rides for various other purposes.

Advocacy for the elderly includes both legal help and complaint processing. A legal services development program now has 10 projects of counseling, community education and representation to help the elderly with their legal rights. There were 4,350 beneficiaries in Fiscal 1981. The ombudsman, or complaint investigation, program regarding long-term care now has volunteers and volunteer supervisors to inform the elderly about types of care and to process complaints.

As the state's population continues to age, with more than 360,000 persons past 65 years old as shown by the 1980 census, the work of the unit becomes ever more challenging and vital. The unit sponsored statewide activities this year which addressed issues on aging. An estimated 4,000 persons attended the Oklahoma Statewide Conference on Aging held in May. The Oklahoma White House Conference on Aging was held April 20, with an estimated 500 persons in attendance. This meeting is preparatory to the national conference in November. Scheduled in Fiscal 1982 are a seminar on long-term care alternatives in August 1981 and the statewide Silver-Haired Legislature in November 1981. The National White House Conference on Aging also will be held in November. ■

Child Support Enforcement

Cases opened	10,676
Absent parents located	6,072
Support obligations established	3,249
Paternity established	452
Total collections	**$3,807,179**
	—Fiscal 1981

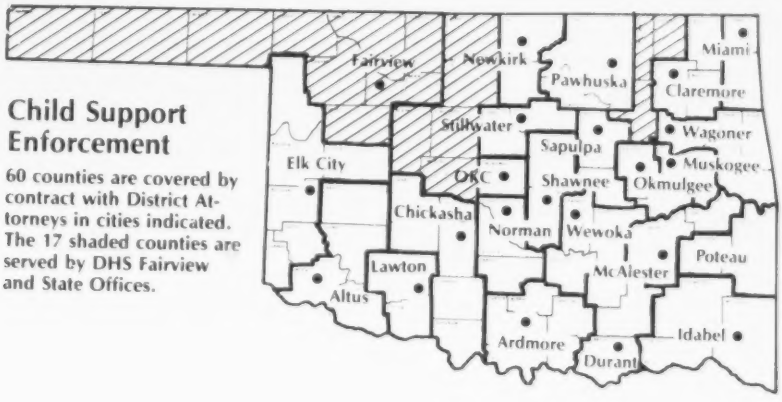
Legislation for child support enforcement has been in effect since 1950, but the passage of PL 93-647 in 1975 ordered states to pursue vigorously a program of such enforcement. That law added Title IV-D to the federal Social Security Act and required states to establish and maintain an effective child support enforcement program. The program required states to establish paternity, obtain continuing support and enforce the existing child support obligations of absent parents.

PL 93-647 also provided that non-AFDC families could obtain program help as a possible safeguard against future destitution. DHS charges a fee to non-AFDC clients to offset the cost of enforcement services. Such clients apply for help at the agency's county offices, and the enforcement staff pursues support obligations the same as with AFDC-related cases.

The new program began in Oklahoma August 1, 1975, with establishment of the DHS Child Support Enforcement Unit. That unit was re-named the Division of Child Support Enforcement in Fiscal 1981. DCSE works with other DHS divisions and units and has cooperative agreements with 22 district attorney offices covering 60 counties. Nine counties in northwest Oklahoma are served by a regional DCSE office in Fairview, Major County. The cooperative agreements enable DCSE to enforce existing court orders, establish paternity and establish child support obligations locally. DCSE can thus follow up promptly on delinquent support and streamline its efforts to establish paternity and obligations after the client becomes eligible for AFDC or otherwise applies for help.

When an application is made for AFDC because of a parent's absence from the home and nonsupport of the children, the caretaker must assign child support rights to DHS as a condition of eligibility. The client is required to cooperate with the child support staff so that DHS can take legal steps to collect support payments from the absent parent. In processing an AFDC application, the county staff makes referral to the local district attorney's child support enforcement office, if in one of the cooperative agreement counties; if not, to DCSE. If deprivation has resulted from a divorce and child support has been ordered by the court, the order will be modified to pay the local court clerk. The clerk forwards the payments to DCSE or to the local district attorney's office for posting to the DCSE payment receipt file. These procedures enable the court clerk, district attorney's office and DHS to monitor the absent parent's payments accurately and to compute arrearage in the event of a delinquency.

DCSE had 123,403 cases as of June 30. District attorney offices had been assigned 93,668 of those cases, and the DCSE northwest regional office and the state office serviced the other 29,735 cases. Collections in June 1981 were more than double the amount collected in June 1980. Of the $3.8 million in total collections this year, $2.1 million was collected on behalf of Oklahoma AFDC recipients. ■



Child Support Enforcement

60 counties are covered by contract with District Attorneys in cities indicated. The 17 shaded counties are served by DHS Fairview and State Offices.

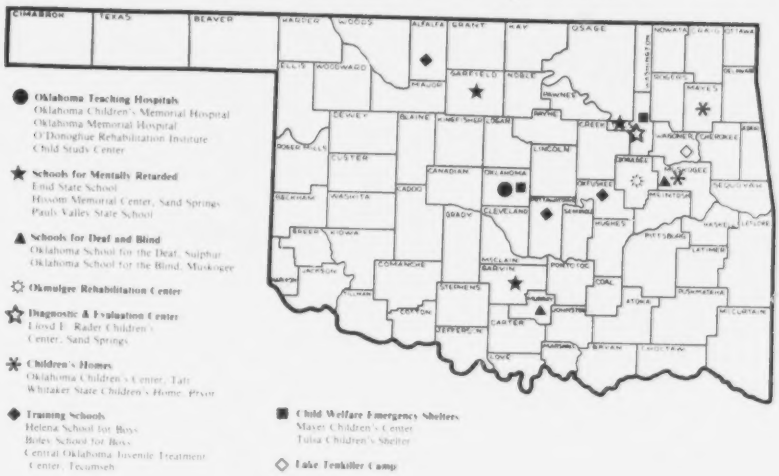
People in Hospitals & Institutional Programs

HOSPITALS & INSTITUTIONS
280,000

The Oklahoma Teaching Hospitals served about 270,000 children and adults. OCMH admitted about 8,500 and saw 150,000 children in outpatient clinics. About 11,400 adults plus 3,600 newborns were inpatients at OMH; and 86,000 more visited the outpatient clinics. Under partial operation, the O'Donoghue Rehabilitation Institute had 100 inpatient admissions and 700 outpatient clinic visits. The Child Study Center had about 10,000 outpatient visits.

More than 1,800 children and young adults were in residence at the schools for the mentally retarded. About 120 were admitted and over 350 evaluations for services were completed.

About 2,200 youths 10 to 18 years old resided at two children's homes, three training schools and the diagnostic, evaluation and treatment center during 1981. The daily average in residence was 640, and the average stay was 6.3 months.



About 250 children were enrolled for the school year at the schools for blind and deaf. Emergency shelters in Tulsa and Oklahoma City cared for almost 2,000 children of all ages with an average daily 85 in residence. The average stay was 15 days.

1971-1981 Expenditures for Hospitals & Institutional Programs

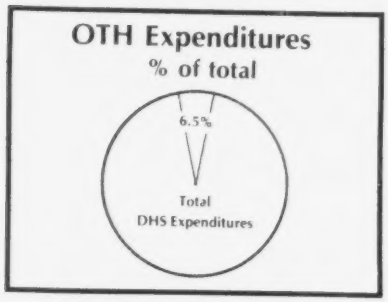
Hospitals & Institutional Programs

Oklahoma Teaching Hospitals

1973-SB 316, transfer of Crippled Children's Hospital (renamed Oklahoma Children's Memorial Hospital).
1974-SB 694 Enlargement of Oklahoma Children's Memorial Hospital to provide general and specialized care for persons under 21 years;
1980-HB 1713, transfer of University Hospital (renamed Okla-Memorial Hospital).

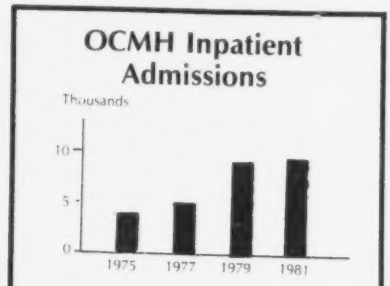
The State of Oklahoma Teaching Hospitals, a group of departmental medical care and treatment facilities located in Oklahoma City, ensures that all citizens of the state have the best medical assistance available to them.

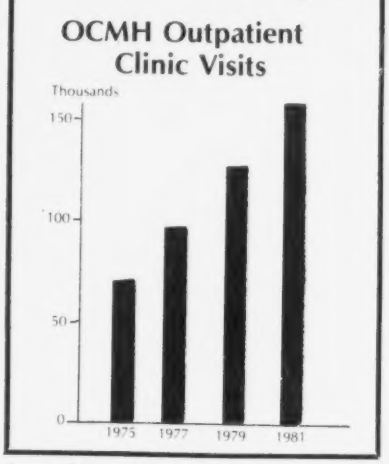
Affiliated with the University of Oklahoma College of Medicine, the group of four institutions includes the Oklahoma Children's Memorial Hospital, the Child Study Center, Oklahoma Memorial Hospital and the Don H. O'Donoghue Rehabilitation Institute.



Oklahoma Children's Memorial Hospital

Oklahoma Children's Memorial Hospital, Oklahoma City, was transferred to DHS from the University of Oklahoma by legislative action, effective July 1, 1973. Since July 1, 1980, it has been an integral part of the State of Oklahoma Teaching Hospitals. OCMH is a full-service medical, surgical and dental facility for all Oklahomans under 21 years of age, and in certain medical areas for a few older than 21 years. It is a regional referral center for complex problems. It is affiliated with the University of Oklahoma in order to function as the pediatric teaching facility for the various health-related colleges of the University. It is fully accredited by the Joint Commission on Accreditation of Hospitals.





The Ben H. Nicholson Tower, the George H. Garrison Tower and the Charles M. Bielstein Center are the major components of OCMH. Inpatient nursing areas are in the Garrison and Nicholson Towers and include one nursing unit assigned to Oklahoma Memorial Hospital adult patients during the latter's construction period. Outpatient functions, laboratories, administration and other support areas are in the Bielstein Center.

Clinical activities in all areas increased during Fiscal 1981, and some remodeling was necessary to handle the greater workload. Outpatient activities showed the greatest increase. Remodeling projects included development of a larger and more convenient adolescent clinic, construction of a new ophthalmology clinic, facilities for reinstitution of an otorhinolaryngology service and clinic, and relocation and expansion of the pediatric practice model clinic, a clinic for continuing care.

Child Study Center

The Child Study Center is a part of the DHS-administered State of Oklahoma Teaching Hospitals in Oklahoma City. It conducts a multidisciplinary program of diagnosis and therapy for children with developmental (including behavioral), neurological and school problems, as well as for children with vision or hearing problems, or both. It provides a preschool program for deaf-blind and other multihandicapped children. A program for autistic and severely language impaired children began in 1981. The building was expanded in April 1981 to double its space.

Oklahoma Memorial Hospital

Oklahoma Memorial Hospital is a full-service general hospital for adults and serves as a regional and statewide referral center for complex medical, surgical and obstetrical problems. It is closely affiliated with the teaching programs of the University of Oklahoma Health Sciences Center. OMH is fully accredited by the Joint Commission on Accreditation of Hospitals and is a member of the Council of Teaching Hospitals, Association of American Medical Colleges.

House Bill 1713, which transferred OMH (formerly University Hospital) to the Oklahoma Human Services Commission, also authorized a renovation and modernization program.

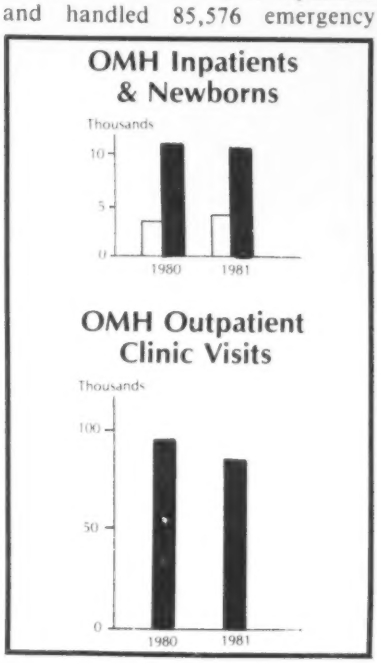
The bill states:

"The people of this state intended that there be an expansion and renovation of the hospital now known as Oklahoma Memorial Hospital when they voted approval

of the HERO Bonds in 1968. This Legislature finds that there continues to be a need for the redevelopment and expansion of the state's primary teaching and research hospital facility and the Department is authorized to complete the hospital according to the plan approved by vote of the public in 1968. To do so it may provide for the repair, alteration or remodeling of any existing building or for the demolition of existing structures and their replacement with new facilities, and may transfer funds from any one account to any other account as required to accomplish this purpose."

Some buildings, dating back as far as 1919, have been demolished and either replaced or are in the process of being replaced. Construction began or was completed this fiscal year on the following: the West Addition, connector building, three patient floors added to the Everett Building, two floors on the Physician and Education Building and an elevated walkway connecting the Everett Building with the 1,100-car parking structure. OMH retained its newer buildings: the outpatient clinics building and its addition, radiology; the Everett Building; and the Emergency Medicine and Trauma Center.

OMH admitted 11,349 inpatients and handled 85,576 emergency room and outpatient visits. There were 3,566 newborn deliveries. The average daily adult inpatient census was 224, and the average daily newborn inpatient census was 36.



Don H. O'Donoghue Rehabilitation Institute

The Don H. O'Donoghue Rehabilitation Institute is a multipurpose inpatient and outpatient facility designed to provide short range and intermediate medical and rehabilitative services to the physically disabled. A team approach to rehabilitation — including medical, vocational, educational, psychological and social services — is used with each client. The newest member of the Oklahoma Teaching Hospitals, the Institute began services in early 1981. It is located on the campus of the University of Oklahoma Health Sciences Center and provides educational support for future medical and allied health professionals and researchers. The goal of the Institute is to integrate the patient back into the community as fully as possible. Toward that goal, plans are made to provide vocational evaluation, recommendations for changing the client's environment if necessary and resources for the client's benefit.

The inpatient area is designed for 120 beds, all of which should be available for occupancy by late 1981. As of June 30, 1981, the Institute had 69 beds available. There were 85 admissions during Fiscal 1981, for an average daily inpatient census of some 22 patients and an average inpatient bed occupancy rate of 39.9%. The Institute had 692 outpatients during the fiscal year. New admissions most frequently were for orthopedic, pediatric and neurological services. ■

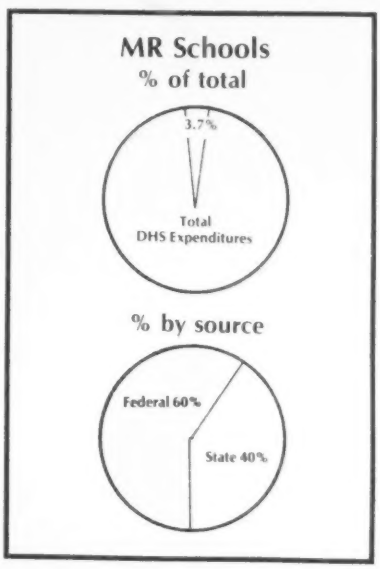
Schools for the Mentally Retarded

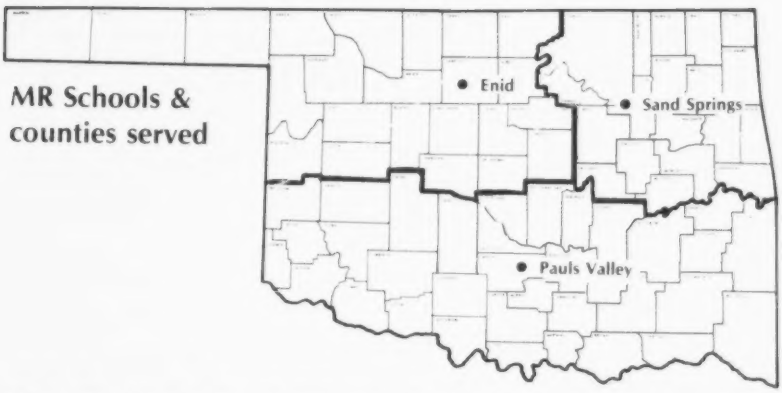
Total Residents	**1,836**
Enid State School	675
Hissom Memorial Center	580
Pauls Valley State School	581
	—June 30, 1981

The 1963 Legislature transferred the three state institutions for the mentally retarded to DHS from the Department of Mental Health. The Enid State School serves retarded children from 23 northwestern counties, the Pauls Valley State School serves 35 southern counties and the Hissom Memorial Center, Sand Springs, serves 19 northeastern counties. The transfer bill directed the Department to use an amount not to exceed $3.75 million per year from the State Assistance Fund to operate the schools, to earn maximum federal matching funds, to increase and improve services and to upgrade staff. The amount specified for the schools later was increased to $6 million. Expenditures have thus far exceeded $279 million, of which some $139.5 million has been from state funds and about $139.6 million has been earned in federal reimbursements.

The three schools are residential centers for the education, care and treatment of mentally retarded persons. Each provides diagnostic and evaluation services. All three are certified as eligible to earn federal reimbursements for specialized intermediate care. Long waiting lists for admission have been eliminated, as many adult residents who had received maximum benefits from care were discharged to families and specialized nursing homes.

Programs have been oriented to the school-age child, with the goal of maximum development for each





child. Individual plans of care are developed for each child and re-evaluated regularly by both professional staff and parents. Services are comprehensive, and the special education classes are state accredited. Each campus offers the full range of vocational rehabilitation services, from pre-program counseling to off-campus job placement.

The three facilities have had varied histories. Enid State School was established by the 1909 Legislature and has always been dedicated to care for the retarded; it has used its present name since 1947. The Pauls Valley campus was first a correctional training school for juveniles and later a hospital for epileptics before becoming a school for the mentally retarded in 1952. The Hissom Memorial Center was transferred to DHS while under construction and opened in 1964. It is named for Mr. and Mrs. Wiley B. Hissom, who deeded to the State the 226 acres which comprise the campus. The center was built following a $1 million appropriation by the 1959 Legislature.

The schools are affiliated for teaching purposes with several Oklahoma colleges and universities. They also participate with colleges in research and grant projects. Educational opportunities for direct care staff are available through in-service training and child-care training classes.

Applications for services to the mentally retarded are made by parents or guardians. Forms may be obtained by writing to the Director of Human Services. P.O. Box 25352, Oklahoma City, OK 73125. After the child has been evaluated, the DHS staff makes recommendations as to eligibility and admission. The child must have a verified mental age of not more than nine years. Placement at a state school is only one of the services available in the mental retardation program. The client may be eligible after discharge for such other agency services as vocational rehabilitation, financial aid, referral for intermediate care, social services and Medicaid coverage. ■

State Homes, Schools and Centers for Children and Youth

Statutory Background

1961-SB 316, HB 883, HB 884, transfer to DHS of two state homes for dependent and neglected children, and four correctional schools for children.

1965-SB 474, transfer to DHS of the Oklahoma School for the Blind, Muskogee, and the Oklahoma School for the Deaf, Sulphur.

1968-State question 463 providing for capital improvements at state institutions including $1 million for a new juvenile diagnostic center.

1970-SB 455, transfer to DHS of the Oklahoma Children's Center, South Campus, formerly Taft State Mental Hospital.

1972-SB 374, opening of the Lloyd E. Rader Children's Diagnostic and Evaluation Center, Sand Springs.

1975-SJR 13, statewide juvenile justice and deliquency prevention service.

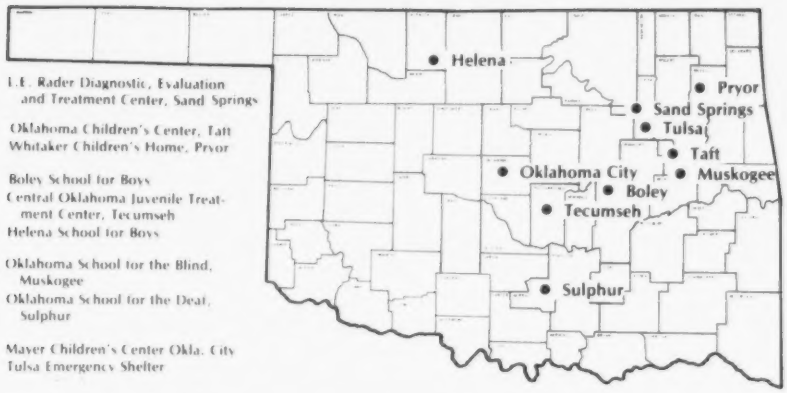
1976-SJR 56, statewide funding for community youth service centers.

The Division of Children and Youth Services administers DHS juvenile services. The division coordinates both institutional and community-based programs, develops and oversees policies and procedures and provides special service programs and professional consultation. Consultations involve psychological and social work services, therapeutic and recreational programs, and management. The division also works with the Oklahoma Council on Juvenile Delinquency, which advises DHS in efforts for statewide juvenile justice and the prevention of delinquency.

Staff members interpret and monitor programs, evaluate training needs and develop training schedules. They take part in training workshops and provide help in training personnel. They negotiate Title XX contracts for information and referrals, community youth services and emergency shelters for children. Contracts are monitored for compliance, services and client eligibility. Staff members also give technical help to the contract centers. DHS has contracts with some 40 youth services centers.

The division provides intake, probation, parole, diagnosis, evaluation and treatment, and group homes and institutional services; see Court Related and Community Services.

Homes, Schools, Centers
% of total



Institutional Programs

The Institutional Services Division supervises two training schools, a juvenile treatment center, two state homes and a diagnostic, evaluation and treatment center. In addition, there are two schools for handicapped children. Correctional schools are Helena State School for Boys, Boley State School for Boys, a section of the L. E. Rader Diagnostic and Evaluation Center, Sand Springs, and the Central Oklahoma Juvenile Treatment Center, Tecumseh. The latter is the former Girls' Town and also serves children adjudicated delinquent or in need of supervision. The state homes are Whitaker State Children's Home, Pryor, and Oklahoma Children's Center, Taft. Schools for the handicapped are the Oklahoma School for the Blind, Muskogee, and Oklahoma School for the Deaf, Sulphur. All are residential care facilities, and all children except those at the Muskogee and Sulphur campuses are in legal custody of DHS.

Combined enrollments at the schools and homes on June 30, 1981, totaled 829 children, with 514 in residence and 315 on leave. Excluded were 237 children who were enrolled in Schools for the Deaf and the Blind on May 29, the last day of the school year. These handicapped children would bring the total to 1,066 children enrolled. ■

Intake, Probation and Parole Review Board

The Juvenile Intake, Probation, and Parole Review Board conducts parole release hearings for juveniles adjudicated delinquent who are in DHS schools or who live in group homes. The board must also ensure due process and conduct parole revocation and administrative transfer hearings. The board reviews all client waivers involved in revocation and transfer hearings. There were 798 parole release hearings this year, with 333 juveniles awarded parole or supervised community placement. Board decisions were distributed as follows: 268 of 726 juveniles in correctional facilities were approved for release, as were 37 of 40 juveniles on parole assessment leave from those facilities and 28 of 32 juveniles living in group homes.

Other board activity this year included the scheduling of 39 parole revocation hearings and 20 administrative transfer hearings. Of the revocation hearings, 15 were waived by the juveniles and their attorneys, nine were cancelled, and two were rescheduled. Thirteen hearings were completed, with nine revocations sustained and four denied. Of the 20 transfer hearings scheduled, 17 resulted in board approval for transfer, two were denied and one was waived. ■

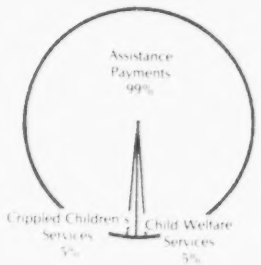
Institutional Maintenance, Construction and Farms

Established in 1961, the Institutional Maintenance, Construction and Farms Unit provides consultation, planning, engineering, construction, repair and remodeling of physical plant facilities at DHS institutions. The Unit also coordinates and supervises the operation of institutional farm programs.

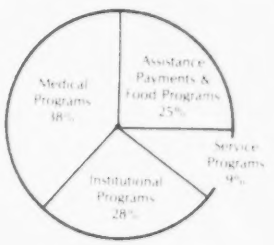
The Unit's major work this year was renovation of Oklahoma Memorial Hospital . Other projects included new construction and renovation of facilities at the Lake Tenkiller Camp, completion of the Oklahoma Children's Center wastewater treatment lagoons, and the Pauline Mayer Children's Center. ■

Administrative Services

1951 State Expenditures
By type of program



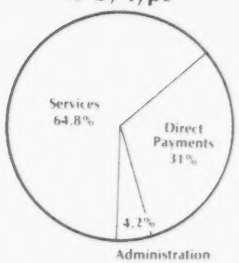
1981 State Expenditures
By type of program



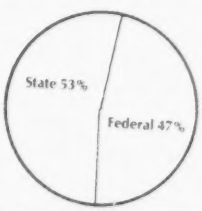
DHS has added various programs and services since the early 1950s, when its main functions had been cash grant programs and child welfare services. Oklahoma legislatures have transferred and assigned programs to DHS, in order to shift financing from general revenue to the earmarked state sales tax. The Department has earned more than $5.4 billion in federal reimbursements since Fiscal 1951, of which some $105.5 million was earned because of the availability of state sales tax funds for matching. This $105.5 million was federal reimbursements which became available during interim periods when the Legislature was not in session.

The number of employees has increased over the years to keep pace with added programs and federal mandates for staffing. State compliance with the mandates is necessary to obtain federal matching funds. The final payroll for Fiscal 1981 totaled 13,663 full- and part-time employees, of whom 5,433 were assigned to assistance payments functions, 820 to social services, 1,315 to state homes and schools, 1,986 to state schools for the mentally retarded, and 4,109 to DHS hospitals. ■

1981 Expenditures
% by type



Administration
% by source of funds



Appeals Unit

Any client may appeal a decision or delay by the DHS staff regarding his application, other request or grant. The right to appeal is guaranteed by the state plan agreement between the Oklahoma Commission for Human Services and its federal contractors. An appeal results in a hearing by an Appeals Unit referee to document evidence and testimony pending final decision by a committee of state office staff members who have had no part in the dispute. The DHS legal counsel is chairman of the committee.

The unit received 961 appeals this fiscal year and disposed of 943, including 485 decided in favor of the appellant. Other dispositions were decisions in favor of DHS or dismissed or withdrawn. ■

Legal Division

The 1968 Legislature authorized the Commission to provide a Legal Division for DHS. Attorneys were hired to advise the Commission and the Director and to represent DHS in legal proceedings. Examples of work include services to children, recoveries of medical expenditures from third parties, personnel actions, workmen's compensation, overpayment collections, appeals hearings, welfare fraud prosecutions and enforcement of child support for children in DHS custody. ■

Planning and Evaluation

The Division of Planning and Evaluation reviews all proposals having a potential impact on DHS, the agency's federal-state programs, and all legislation, regulations, plan materials and requests for federal funds. The division coordinates information from program supervisors, prepares summaries and briefs and recommends actions. Staff members monitor guidelines, regulations and statutes for DHS compliance.

This year's workload involved some 600 congressional bills, about 500 proposed or final published changes in federal regulations and many implementing and interpretive federal documents. ■

Inspector General

The Office of Inspector General was established in 1979 by the Director in response to recommendations by the 1978 National Fraud and Abuse Conference. The office investigates possible fraud, abuse or errors in DHS programs and makes internal investigations. Program reviews include public assistance, hospitals and physicians, the vendor drug program, vendor audits, overpayments and nursing home practices. The work is generated by referrals and by program monitoring. Investigators were assigned 5,897 cases this year.

Audits of 27 day care facilities resulted in overpayments established and fully refunded totaling

$8,979, with reimbursements to clients of $507. Audits of recipient trust funds at 20 nursing homes led to clients being reimbursed in the amount of $8,077. Investigations of 1,178 cases of suspected third party liability for medical care enabled DHS to help collect $820,913. There were 315 reviews of vendor drug claims and alcohol treatment centers, 949 Workers' Compensation cases, 208 physician reviews, 134 hospital reviews and 514 reviews of physicians' claims. The staff investigated 118 pharmacies, including eight complaints: two pharmacies were terminated from the Medicaid program and five were suspended. Overpayments of $5,499 were assessed.

As a result of DHS investigations, two nursing home operators were ordered to refund $1.4 million plus interest to DHS. Thirty felony convictions in public assistance cases resulted in court-ordered restitution of $59,321, as did 25 felony convictions in food stamp cases totaling $23,007. One felony conviction of a day-care provider resulted in restitution of $1,568. ■

Administrative Review

Latest estimated error rates:	
AFDC grants	3.9%
Medicaid payments	1.8%

The purpose of the Administrative Review Unit is to gauge the degree of validity in the agency's three main outlay programs: Aid to Families with Dependent Children, Food Stamps and Medicaid payments. The unit's activities are required by federal mandate and include field investigations of cases receiving benefits, data gathering and reporting, summarizations of findings and liaison with federal agencies sponsoring the programs. Findings are re-reviewed by those agencies.

This verification of caseloads, commonly termed quality control or quality assurance, is conducted in all states and territories. All work and findings are taken from computerized sampling plans as approved by federal agencies. Samples are presumed free from known bias and vary in size from more than 1,500 to 2,400 case reviews per year per program. Oklahoma's error rates are low. Only 3.9% of AFDC grant money is issued in error ($3.90 overpaid or paid to ineligible cases per $100 of outlay). Only $1.80 per $100 of Medicaid funds is paid in in error.

A primary purpose of quality control is to make certain the clients receive fair and equitable treatment. Investigators are members of the unit staff rather than the staffs of county offices, and have thorough knowledge of DHS policies. Discrepancies between unit findings and county office information are resolved so as to determine whether agency policy is being applied correctly and equitably.

Problem areas are addressed in corrective action plans and are reviewed by all concerned. Client protection is served also by quality control reviews of case terminations and denied applications. ■

Staff Development

The Division of Staff Development assesses training needs of the Department, directs pre-service training grants in social work, provides in-service training for DHS staff members and coordinates advanced education and training for staff members with scholarships. Needs assessments require consultations with other divisions and units to determine specific employee training needs. Pre-service training grants are made for upgrading social work curriculum at the University of Oklahoma, Norman, and East Central University, Ada. Pre-service training also included 39 field placements within DHS for college students.

In-service training is either conducted or arranged by the Division staff. There were 28,370 course enrollments this year, mainly geared to specific program training but also ranging from new employee orientation to clerical and management skills. Advanced education, in addition to 100 scholarships awarded this year by the Commission, included short courses, workshops, institutes and other meetings. There were 40 scholarships affording educational leave with pay, 28 tuition scholarships, five work-study nursing scholarships and 27 scholarships for teachers at the DHS Schools for the Deaf and the Blind.

The first two groups of scholarships are designed to help agency staff members complete work toward their master's degrees, the nursing scholarships aid licensed practical nurses studying to become registered nurses and the blind-deaf teaching scholarships help upgrade teaching competency and assure teacher certification. All scholarship recipients are DHS employees. ■

Old Age and Survivor's Insurance

The Bureau of Old Age and Survivor's Insurance collects premiums from state and local government agencies and their employees. The bureau negotiates agreements with these agencies for Social Security coverage, reports data on wages, collects contributions and maintains files on all covered employees. This year, the bureau collected $232.9 million for coverage of 191,459 employees. Collections were $26.5 million more than in Fiscal 1980. ■

Management Information

The Management Information Division was established in June 1966 to develop, coordinate, control and operate the electronic data processing systems which support the Department of Human Services. Prior management information functions had been a part of the responsibility of the Finance Division. MID is a 24-hour, seven-day-a-week operation located in the Computer Data Center.

Electronic data processing systems include maintenance of case related data for all programs of the Department. Claims for services arising out of the operation of these programs are processed, payment records maintained, and warrants in payment of claims that pass pre-established audits are prepared for the assistance programs and medical and related vendors. Financial, statistical and management reports are prepared from the available data. ■

1/ Unduplicated by county but not statewide. If a client moved from one county to another during the year and had claims paid by DHS which reported both counties, that client would be included for both counties.
2/ Non-technical medical care: attendant care in the home.
